Gold Fields: a Centenary Portrait, 1987 **Consolidated Gold Fields** Paul Johnson, 1987 Consolidated Gold Fields Paul A. Johnson, 1987 A portrait of the mining finance organization which had its origins in the gold mining industry of South Africa *Consolidated Gold Fields in Australia* Robert Porter, 2020-04-29 Consolidated Gold Fields was a major British mining house founded by Cecil Rhodes in 1892 Diversifying from its South African gold interests the company invested widely during the following century This included investments in the Western Australian gold sector from the 1920s and exploration and mining activities elsewhere in Australia and the Territory of New Guinea In the 1960s Consolidated Gold Fields Australia CGFA was formed CGFA had ambitious plans and the financial backing from London to establish itself as one of the main diversified mining companies in Australia Investments were held in the historic Mount Lyell Mining and Railway Company in Renison and it was one of the first groups to develop iron ore deposits in the Pilbara of Western Australia It also acquired a major interest in mineral sands While the London based Consolidated Gold Fields ceased to exist in 1989 taken over and dismembered by renowned corporate raider Hanson Plc its Australian subsidiary renamed Renison Goldfields Consolidated RGC continued for another nine years as a diversified mining group before it suffered its own corporate demise facilitated by Hanson CGFA and RGC were important participants in Australia's post World War II mining sector This book is a history of a once great British mining finance house and its investments in Australia Consolidated Gold Fields had a rich and broad history in Australia its ultimate fate did not demonstrate its potential as an Australian mining company **The History of Geophysics in Southern Africa** Johan H de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa *Historic Overview of the Witwatersrand Goldfields* J. R. F. Handley, 2004 *The International Gold Trade* Tony Warwick-Ching, 2014-03-14 Activity in the gold markets has focused investors attention on this unique commodity To provide the reader with a better understanding of the trade the book is set out in three sections The first sketches the structure of the gold market from the point of view of the commodity analyst before reviewing in detail the institutions and practices of bullion and futures trading the second looks at gold mining setting the boom of the past decade in the context of a longer term perspective the third surveys the use of gold past and present and discusses the metal's future prospects **Mining Tycoons in the Age of Empire, 1870-1945** Raymond E. Dumett, 2016-12-05 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the

Gilded Age witnessed an unprecedented level of technological change material excess untrammled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who with the thousands of prospectors diggers shift bosses timbermen blastmen and muckers in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world s rich Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals their business interests the technologies they employed and the national and international political considerations under which they operated Furthermore this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked particularly the often long lasting impact on indigenous populations the environment transport links and economic development By approaching the subject matter through this stimulating mix of cultural social economic business and colonial history many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history

Rotberg,1990-10-25 The definitive biography of one of the most controversial figures of the 19th century captures a life that was complex and fascinating evil and good Illustrated The Colonialist William Kelleher Storey,2025-05 Mining magnate politician and imperialist Cecil Rhodes had a larger than life impact on the development of Southern Africa and the extension of British imperial power This critical biography of Rhodes elaborates his life and times showing how his racist politics impacted mining industry transportation warfare and society while discussing his controversial and enduring legacies **International Bibliography of Business History** Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians *The History of Mining* Michael Coulson,2012-11-12 THE INDUSTRY THAT FORGED THE MODERN WORLD Throughout history metals and raw materials have underpinned human activity So it is that the industry responsible for extracting these materials from the

ground mining has been ever present throughout the history of civilisation from the ancient world of the Egyptians and Romans to the industrial revolution and the British Empire and through to the present day with mining firms well represented on the world's most important stock indexes including the FTSE100. This book traces the history of mining from those early moments when man first started using tools to the present day where metals continue to underpin economic activity in the post industrial age. In doing so the history of mining methods important events technological developments the important firms and the sparkling personalities that built the industry are examined in detail. At every stage as the history of mining is traced from 40 000BC to the present day the level of detail increases in accordance with the greater social and industrial developments that have played out as time has progressed. This means that a particular focus is given to the period since the industrial revolution and especially the 20th century. A look is also taken into the future in an effort to chart the direction this great industry might take in years to come. Many books have been written about mining the majority have focused on a particular metal geographical area mining event or mining personality but *The History of Mining* has a broader scope and covers all of these essential and fascinating areas in one definitive volume.

Dreamscapes of Modernity Sheila Jasanoff, Sang-hyun Kim, 2015-09-02 *Dreamscapes of Modernity* offers the first book length treatment of sociotechnical imaginaries a concept originated by Sheila Jasanoff and developed in close collaboration with Sang Hyun Kim to describe how visions of scientific and technological progress carry with them implicit ideas about public purposes collective futures and the common good. The book presents a mix of case studies including nuclear power in Austria Chinese rice biotechnology Korean stem cell research the Indonesian Internet US bioethics global health and more to illustrate how the concept of sociotechnical imaginaries can lead to more sophisticated understandings of the national and transnational politics of science and technology. A theoretical introduction sets the stage for the contributors wide ranging analyses and a conclusion gathers and synthesizes their collective findings. The book marks a major theoretical advance for a concept that has been rapidly taken up across the social sciences and promises to become central to scholarship in science and technology studies.

Transnational Companies and Security Governance Jana Hönke, 2013-08-21 This book investigates governance practiced by non state actors It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering beyond the state Based on extensive primary research in the Democratic Republic of Congo South Africa Europe and North America the book compares companies political role in the 19th and 21st centuries It demonstrates that despite a number of disturbing parallels many contemporary practices are not a reversion to the past but unique to the present The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility Companies invest in local communities and offer human rights training to security forces alongside coercive techniques of fortress protection and stability oriented clientele practice and arrangements of indirect rule The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers private security officers NGO collaborators and others practitioners The book argues that hybrid security practices are not the result of an encounter between a supposed local with the liberal global Instead this hybridity is inherent in the transnational and part and parcel of liberal transnational governance Therefore more critical reflection of global governance in practice is required These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly The book will be of interest to anyone interested in business politics and human rights critical security studies peacebuilding and statebuilding African politics and ethnographic and sociological approaches to global governance and international relations more generally

Going for Gold Jack H. Morris, 2010-05-10 Details how Newmont Mining revolutionized the gold mining industry and remains the second largest gold miner in the world Jack H Morris asserts that Newmont is the link between early gold mining and today s technology driven industry We learn how the company s founder and several early leaders grew up in gold camps and how in 1917 the company helped finance South Africa s largest gold company and later owned famous gold mines in California and Colorado In the 1960s the company developed the process to capture invisible gold from small distributions of the metal in large quantities of rock thereby opening up the rich gold field at Carlin Nevada Modern gold mining has all the excitement and historic significance of the metal s colorful past Instead of panning for ready nuggets today s corporate miners must face heavy odds by extracting value from ores containing as little as one hundredth of an ounce per ton In often remote locations where the capital cost of a new mine can top 2 billion 250 ton trucks crawl from half mile deep pits and ascend beetle like loaded with ore for extraction of the minute quantities of gold locked inside Morris had unique access to company records and the cooperation of more than 80 executives and employees of the firm but the company exercised no control over content The author tells a story of discovery and scientific breakthrough strong willed flamboyant leaders like founder Boyce Thompson corporate raiders such as T Boone Pickens and Jimmy Goldsmith

shakedowns by the Indonesian government and monumental battles with the French over the richest mine in Peru and learning to operate in the present environmental regulatory climate This is a fascinating story of the metal that has ignited passions for centuries and now sells for over 1 000 an ounce *Johannesburg* Keith Beavon,2022-08-01 Until now there has been no single text that brings together the material that reveals the unfolding geography of Johannesburg South Africa This books describes the history of the city from its days as a mining camp to its position of premier metropolis in Africa The present geography of Johannesburg and the problems and dysfunctions that is hat exhibited at various stages in its history since 1886 cannot be understood without a firm grasp of what has evolved of the past 120 years *International Competition and Industrial Change* Charles Harvey,Jon Press,2014-02-04 First Published in 1990 This collection of essays is intended shed light upon key issues in the history of mining and metallurgy issues such as investment and organisation professionalisation the impact of technological change and the problematic relationship between mineral wealth and sustained economic development **Engineering Nature** Jessica B. Teisch,2011-02-01 Focusing on globalization in the late nineteenth and early twentieth centuries Jessica Teisch examines the processes by which American water and mining engineers who rose to prominence during and after the California Gold Rush of 1849 exported the United States growing technical and environmental knowledge and associated social and political institutions In the frontiers of Australia South Africa Hawaii and Palestine semiarid regions that shared a need for water to support growing populations and economies California water engineers applied their expertise in irrigation and mining projects on behalf of foreign governments and business interests Engineering Nature explores how controlling the vagaries of nature abroad required more than the export of blueprints for dams canals or mines it also entailed the problematic transfer of the new technology s sociopolitical context Water engineers confronted unforeseen variables in each region as they worked to implement their visions of agrarian settlement and industrial growth including the role of the market government institutions property rights indigenous peoples labor and not last the environment Teisch argues that by examining the successes and failures of various projects as American influence spread we can see the complex role of globalization at work often with incredibly disproportionate results
