**Spitting in the Soup** Mark Johnson, 2016-07-01 Doping is as old as organized sports From baseball to horse racing cycling to track and field drugs have been used to enhance performance for 150 years For much of that time doping to do better was expected It was doping to throw a game that stirred outrage Today though athletes are vilified for using performance enhancing drugs Damned as moral deviants who shred the fair play fabric dopers are an affront to the athletes who don't take shortcuts But this tidy view swindles sports fans While we may want the world sorted into villains and victims putting the blame on athletes alone ignores decades of history in which teams coaches governments the media scientists sponsors sports federations and even spectators have played a role The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup that is to tell the truth about the spectacle we crave In Spitting in the Soup sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports Johnson unwinds the doping culture from the early days when pills meant progress and uncovers the complex relationships that underlie elite sports culture the essence of which is not to play fair but to push the boundaries of human performance It's easy to assume that drugs in sports have always been frowned upon but that's not true Drugs in sports are old It's banning drugs in sports that is new Spitting in the Soup offers a bitingly honest clear-eyed look at why that's so and what it will take to kick pills out of the locker room once and for all
