Discursive Remembering Lucas M. Bietti, 2014-10-14 This book aims at building a bridge between the social and political aspects of remembering and the cognitive and discourse processes driving such activities By analyzing these cognitive and discursive processes Bietti explores practices of individual and collective remembering in institutional and private settings in relation to periods of political violence in Argentina This books begins to fill the conceptual gap between cognitive oriented approaches to remembering that draw conclusions about how memory functions in the mind without a detailed discourse analysis of the communicative interaction in which this process unfolds and the discourse and pragmatic oriented approaches that are mainly interested in analyzing the rhetorical features of conversational remembering in some cases disregarding that there are underlying cognitive mechanisms that drive the construction of discourses about past experiences The empirical analysis shows that individual and collective remembering in relation to periods of political violence in Argentina vary in pragmatic ways due to the fact that these accounts of the past were constructed with reference to the communicative situation Thus this book also aims at shedding new light on the current

practices of commemoration and remembrance related to periods of political violence in Argentina in public and private settings
