Highly Effective Therapy Len Sperry, 2010-03-17 Mental health professionals and accrediting bodies have steadily been embracing competency focused learning and clinical practice In contrast to a skill a competency is a level of sufficiency evaluated against an external standard Learning to be clinically competent involves considerably more than the current emphasis on skill and micro skill training While there are now a small number of books that describe the various clinical competencies of counseling and psychotherapy none of these books focus on how to learn them Highly Effective Therapy emphasizes the process of learning these essential competencies It illustrates them in action with evidence based treatment protocols and clinical simulations to foster learning and competency Highly Effective Therapy is a hands on book that promotes learning of the 20 competencies needed for effective and successful clinical practice **Handbook of**

Effective Psychotherapy Thomas R. Giles, 2012-12-06 Handbook of Effective Psydwtherapy is the culmination of 15 years of personal interest in the area of psychotherapy outcome research In my view this is one of the most interesting and crucial areas in the field it has relevance across disparate clinical disciplines and orientations it provides a measure of how far the field has progressed in its efforts to improve the effectiveness of psychotherapeutic inter vention and it provides an ongoing measure of how readily clinicians adapt to scientific indications in state of the art care Regrettably as several of the chapters in this volume indicate there is a vast chasm between what is known about the best available treatments and what is applied as the usual standard of care On the most basic level there appears to be a significant number of clinicians who remain reluctant to acknowledge that scien tific study can add to their ability to aid the emotionally distressed I hope that this handbook with its many delineations of empirically supported treatments will do something to remedy this state of affairs

Toward Effective Counseling and Psychotherapy Charles B. Truax, Robert Carkhuff, 2007-09-01 The field of counseling and psychotherapy has for years presented the puzzling spectacle of unabating enthusiasm for forms of treatment whose effectiveness cannot be objectively demonstrated With few exceptions statistical studies have consistently failed to show that any form of psychotherapy is followed by significantly more improvement than would be caused by the mere passage of an equivalent period of time Despite this practitioners of various psychotherapeutic schools have remained firmly convinced that their methods are effective Many recipients of these forms of treatment also

believe that they are being helped The series of investigations reported in this impressive book resolve this paradoxical state of affairs The investigators have overcome two major obstacles to progress in the past lack of agreement on measures of improvement and difficulty of measuring active ingredients of the psychotherapy relationship The inability of therapists of different theoretical persuasions to agree on criteria of improvement has made comparison of the results of different forms of treatment nearly impossible The authors have solved this intractable problem by using a wide range of improvement measures and showing that regardless of measures used in different studies a significantly higher proportion of results favor their hypothesis than disregard it Overall this book represented a major advance at the time of its original publication and is of continuing importance The research findings resolve some of the most stubborn research problems in psychotherapy and the training program based on them points the way toward overcoming the shortage of psychotherapists Charles B Truax is in addition to this book author of Counseling and Psychotherapy Process and Outcome The Process of Group Psychotherapy Relationships between Hypothesized Therapeutic Conditions and Intrapersonal Exploration Toward a Tentative Measurement of the Central Therapeutic Ingredients and Talking Won t Help A Study of the Process and Outcome of Psychotherapy with Hospitalized Schizophrenics Robert R Carkhuff is president of Human Technology Inc and chairman of Carkhuff Institute of Human Technology He is the author of The Possibilities Leader The Possibilities Mind and Beyond Counseling and Therapy
