Advances in Perinatal Medicine E. Friedman, L. Gluck, Aubrey Milunsky, 2013-11-11 The state of health care is reflected by perinatal and neonatal morbidity and mortality as well as by the frequencies of long term neurologic and developmental disorders Many factors some without immediately recognizable significance to childbearing and many still unknown undoubtedly contribute beneficially or adversely to the outcome of pregnancy Knowledge concerning the impact of such factors on the fetus and surviving infant is critical Confounding analyses of pregnancy outcome especially these past two or three decades are the effects of newly undertaken invasive or inactive therapeutic approaches coupled with the advent of high technology Many innovations have been introduced without serious efforts to evaluate their impact prospectively and objectively The consequences of therapeutic misadventures characterized the past it seems they have been replaced to a degree by some of the complications of applied technology Examples abound after overuse of oxygen was recognized to cause retrolental fibroplasia its restriction led to an increase in both neonatal death rates and neurologic damage in

surviving infants Administration of vitamin K to prevent neonatal hemorrhagic disease particularly when given in what we now know as excessive dose occasionally resulted in kernicterus Prophylactic sulfonamide use had a similar end result More recent is the observation of bronchopulmonary dysplasia as a complication of respirator therapy for hyaline membrane disease

A Practical Approach to Anesthesia for Emergency Surgery
Manju N. Gandhi, Anila D. Malde, Amala G. Kudalkar, Hemangi S. Karnik, 2011-07. There is a large influx of trauma, general surgical, pediatric, neurosurgical and obstetric emergencies as the hospital is one of the major public hospitals located in a densely populated region sitting amidst major routes in the city. It also provides services for emergency cardiovascular, cerebrovascular interventions and cadaver transplants. Daily lessons from this tremendous emergency work inspired us to bring out this book. There is plethora of reference material available in basic sciences related to anesthesiology, namely physiology, pharmacology, physics and anatomy. Similarly, a large number of textbooks are on techniques such as general, regional, monitored anesthesia care as well as super specialties like cardiac, neurosurgical and pediatric anesthesia etc. But there is a limited availability of books and references for emergency anesthesia. One has to scan and integrate parts from various sources. This book is an attempt to assimilate the scattered information and add clinical expertise. Contents of this book have been divided into nine sections to cover majority of the emergencies. General considerations for adults, obstetric and pediatric sections have been written separately to avoid duplication. An additional challenge is cases with various medical disorders for emergency surgeries. Efforts have been taken to accommodate them in first section and obstetric section. The contributors of this book work together at LTMMC and LTMGH and have a well balanced team with fresh talent bringing the latest technological knowledge and tenured practitioners supplementing it with applied experience. Part of the team worked on collection of the matter from different sources for an ideal scenario while the senior faculty members used their vast

clinical experience for a more practical and realistic application These combined efforts have been truly beneficial to achieve our goal to rationally mix latest technology with clinical experience and identify potential ways to conduct anesthesia with best results at least costs and minimum risk **Anesthetic and Obstetric Management of High-Risk Pregnancy** Sanjay Datta,2006-04-29 It has been enormously satisfying to prepare the third edition of Anesthetic and Obstetric Management of High Risk Pregnancy because it fulfills the need for close communication between two specialties anesthesiology and obstetrics This relationship is necessary not only to take care of the sick parturient but also to deliver a healthy baby New developments in obstetrics and in obstetric anesthesia necessitated this third edition Most of the contributors to this edition are new and they have provided information on the latest approaches as well as updated information In addition Chapter 13 Critical Care Anesthesia for High Risk Parturients is completely new Like earlier editions the third edition includes contributions from an international team of experts in the field of obstetric anesthesia and obstetrics I thank all the authors for their valuable contributions The authors have expressed their own opinions and recommendations which do not necessarily reflect my own views I also wish to thank Ms Elizabeth Kiernan for her endless help in completing the new edition I sincerely hope this edition will further reinforce the concept of the team approach for taking care of the high risk parturient
