Egyptian Times Facts And Things To Do Little Histories:

The Historians' History of the World Vol.1 (of 25) (Illustrations) Henry Smith Williams, A complete world history should properly speaking begin with the creation of the world as man's habitat and should trace every step of human progress from the time when man first appeared on the globe Unfortunately the knowledge of to day does not permit us to follow this theoretical obligation We now know that the gaps in the history of human evolution as accessible to us to day vastly exceed the recorded chapters that in short the period with which history proper has at present to content itself is a mere moment in comparison with the vast reaches of time which in recognition of our ignorance we term prehistoric But this recognition of limitations of our knowledge is a quite recent growth no older indeed than a half century Prior to 1859 the people of Christendom rested secure in the supposition that the chronology of man's history was fully known from the very year of his creation One has but to turn to the first chapter of Genesis to find in the margin the date 4004 B C recorded with all confidence as the year of man's first appearance on the globe One finds there too a brief but comprehensive account of the manner of his appearance as well as of the creation of the earth itself his abiding place Until about half a century ago as has just been said the peoples of our portion of the globe rested secure in the supposition that this record and this date were a part of our definite knowledge of man's history Therefore one finds the writers of general histories of the earlier days of the nineteenth century beginning their accounts with the creation of man B C 4004 and coming on down to date with a full and seemingly secure chronology Our knowledge of the world and of man's history has come on by leaps and bounds since then with the curious result that to day no one thinks of making any reference to the exact date of the beginnings of human history unless indeed it be to remark that it probably reaches back some hundreds of thousands of years The historian can speak of dates anterior to 4004 B C to be sure The Egyptologist is disposed to date the building of the Pyramids a full thousand years earlier than that And the Assyriologist is learning to speak of the state of civilisation in Chaldea some 6000 or 7000 years B C with a certain measure of confidence But he no longer thinks of these dates as standing anywhere near the beginning of history He knows that man in that age in the centres of progress had attained a high stage of civilisation and he feels sure that there were some thousands of centuries of earlier time during which man was slowly climbing through savagery and barbarism of which we have only the most fragmentary record He does not pretend to know anything except by inference of the dawns of civilisation Whichever way he turns in the centres of progress such as China Egypt Chaldea India he finds the earliest accessible records covering at best a period of only eight or ten thousand years giving evidence of a civilisation already far advanced Of the exact origin of any one of the civilisations with which he deals he knows absolutely nothing The Creation of Man with its fixed chronology is a chapter that has vanished from our modern histories To be continue in this ebook [A History of Science \(Vol. 1-5\)](#) Henry Smith Williams, Edward Huntington Williams, 2023-12-16 A History of Science Vol 1 5 is an expansive anthology that charts the monumental journey of scientific thought from antiquity to the modern era

This collection captures the evolution of scientific discovery and thought across multiple disciplines exploring not only transformative breakthroughs but also the lesser known narrative threads that have intricately woven the fabric of science. Encompassing a diverse array of literary styles from analytical discourses to narrative explorations, the volumes provide a rich tapestry of knowledge that reflects the multiplicity of human curiosity and intellect. As readers turn the pages, they will encounter standout treatises that reveal the profound impacts of scientific exploration on society and culture at large. Under the editorial prowess of Henry Smith Williams and Edward Huntington Williams, this collection brings together an illustrious cohort of contributors. These authors, through their varied scholarly and professional backgrounds, construct a narrative that aligns with significant historical and cultural movements. Their writings reflect an engagement with a period marked by sweeping changes, enlightening readers about the roles innovation and experimentation have played in shaping both the past and the contemporary scientific landscape. The compilation serves as a testament to the dynamic interplay between scientific developments and societal transformations. This collection offers readers a unique scholarly voyage through the evolution of science. As such, *A History of Science Vol 1 5* not only provides a compendium of scientific wisdom but also a platform for vibrant dialogue among disparate scientific voices. It is an invaluable educational resource that enhances understanding of humanity's scientific pursuits. Readers are invited to immerse themselves in these texts, experiencing firsthand the rich perspectives and profound insights into scientific advancement across the ages.
