## **Electronic Music Macmillan Music:**

The Routledge Research Companion to Electronic Music: Reaching out with Technology Simon Emmerson, 2018-05-16

The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology. The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years. The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art. Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions. This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century. Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice. Research in this field is now increasingly multi disciplinary. Technological developments are embedded in practices which may be musical social individual and collective. The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up. Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music.

**Living Electronic Music** Simon Emmerson, 2017-09-29 Drawing on recent ideas that explore new environments and the changing situations of composition and performance Simon Emmerson provides a significant contribution to the study of contemporary music bridging history aesthetics and the ideas behind evolving performance practices. Whether created in a studio or performed on stage how does electronic music reflect what is live and living. What is it to perform live in the age of the laptop. Many performer composers draw upon a library of materials some created beforehand in a studio some coded on the fly others plundered from the widest possible range of sources. But others refuse to abandon traditionally created and structured electroacoustic work. Lying behind this maelstrom of activity is the perennial relationship to theory that is ideas principles and practices that somehow lie behind composers and performers actions. Some composers claim they just respond to sound and compose with their ears while others use models and analogies of previously non musical processes. It is evident that in such new musical practices the human body has a new relationship to the sound. There is a historical dimension to this for since the earliest electroacoustic experiments in 1948 the body has been celebrated or sublimated in a strange dance of forces in which it has never quite gone away but rarely been overtly present. The relationship of the body performing to the spaces around has also undergone a revolution as the source of sound production has shifted to the loudspeaker. Emmerson considers these issues in the framework of our increasingly acousmatic world in which we cannot see the source of the sounds we hear.

For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults. Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films. The units are highly flexible allowing any public or school library to adapt them to their particular needs.

*Live Electronic Music* Friedemann Sallis, Valentina Bertolani, Jan Burle, Laura Zattrra, 2017-11-20 During the twentieth century electronic technology enabled the explosive development of new tools for the production performance dissemination and conservation of music. The era of the mechanical reproduction of

music has rather ironically opened up new perspectives which have contributed to the revitalisation of the performer's role and the concept of music as performance. This book examines questions related to music that cannot be set in conventional notation reporting and reflecting on current research and creative practice primarily in live electronic music. It studies compositions for which the musical text is problematic that is non-existent, incomplete, insufficiently precise or transmitted in a nontraditional format. Thus at the core of this project is an absence. The objects of study lack a reliably precise graphical representation of the work as the composer or the composer-performer conceived or imagined it. How do we compose, perform and study music that cannot be set in conventional notation? The authors of this book examine this problem from the complementary perspectives of the composer, the performer, the musical assistant, the audio engineer, the computer scientist and the musicologist.
