Cognitive Work Analysis Kim J. Vicente,1999-04-01 This book describes for the first time in pedagogical form an approach to computer based work in complex sociotechnical systems developed over the last 30 years by Jens Rasmussen and his colleagues at Ris National Laboratory in Roskilde Denmark This approach is represented by a framework called cognitive work analysis Its goal is to help designers of complex sociotechnical systems create computer based information support that helps workers adapt to the unexpected and changing demands of their jobs In short cognitive work analysis is about designing for adaptation The book is divided into four parts Part I provides a motivation by introducing three themes that tie the book together safety productivity and worker health The ecological approach that serves as the conceptual basis behind the book is also described In addition a glossary of terms is provided Part II situates the ideas in the book in a broader intellectual context by reviewing alternative approaches to work analysis The limitations of normative and descriptive approaches are outlined and the rationale behind the formative approach advocated in this book is explored Part III describes the concepts that comprise the cognitive work analysis framework in detail Each concept is illustrated by a case study and the implications of the framework for design and research are illustrated by example Part IV unifies the themes of safety productivity and health and shows why the need for the concepts in this book will only increase in the future In addition a historical addendum briefly describes the origins of the ideas described in the book *The 1984 Guide to the Evaluation of Educational Experiences in the Armed Services* ,1984 The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Coast Guard, Marine Corps, Navy, Dept. of Defense American Council on Education,1980 **The Christian Civil Engineer Technician Handbook** Victor Darnell Hadnot,2002 If you are looking for a book to help you get
