Textual Scholarship David C. Greetham, 1994 First Published in 1994 Routledge is an imprint of Taylor Francis an informa company *The Digital*

Condition Robert Wilkie, 2011-10-03 The acceleration in science technology communication and production that began in the second half of the twentieth century developments which make up the concept of the digital has brought us to what might be the most contradictory moment in human history The digital revolution has made it possible not only to imagine but to actually realize a world in which social inequality and poverty are vanquished But instead these developments have led to an unprecedented level of accumulation of private profits Rather than the end of social inequality we are witness to its global expansion Recent cultural theory tends to focus on the intricate surface effects of the emerging digital realities proposing that technological advances effect greater cultural freedom for all ignoring the underpinning social context But beneath the surfaces of digital culture are complex social and historical relations that can be understood only from the perspective of a class analysis which explains why the new realities of the digital condition are conditioned by the actualities of global class inequalities It is no longer the case that technology can take on the appearance of a simple or neutral aspect of human society It is time for a critique of the digital times In *The Digital Condition* Rob Wilkie advances a groundbreaking analysis of digital culture which argues that the digital geist which has its genealogy in such concepts as the body without organs spectrality and difference has obscured the implications of class difference with the phantom of a digital divide Engaging the writings of Hardt and Negri Poster Deleuze and Guattari Derrida Haraway Latour and Castells the literature and cinema of cyberpunk and digital commodities like the iPod Wilkie initiates a new direction within the field of digital cultural studies by foregrounding the continuing importance of class in shaping the contemporary Copyright: Sacred Text, Technology, and the DMCA David Nimmer, 2003-01-01 This anthology brings together over a dozen articles published by David Nimmer over the past decade regarding copyright together with updated commentary weaving together the various threads running through them The unifying theme running through the work is the need to reconcile standards in order to protect that most ethereal creation of mankind the written word From that unique vantage point the discussion delves into the religious roots and sacred character of the act of creation Religion and copyright are brought into resonance as issues from one field are deployed to illuminate those in the other Given its culminating focus on the Digital Millennium Copyright Act this work of necessity drills deeply into current advances in technology notably the dissemination of works over the internet The religious perspective shines an unexpected light onto those issues as well **Handbook of Research on Reading Comprehension**

The Arts of Imitation in Latin Prose Christopher Whitton, 2019-06-27 Imitation was central to Roman culture and a staple of Latin poetry But it was also fundamental to prose This book brings together two monuments of the High Empire Quintilian's *Institutio oratoria* Training of the orator and Pliny's *Epistles* to reveal a spectacular project of textual and ethical imitation As a young man Pliny had studied with Quintilian In the *Epistles* he meticulously transforms and subsumes his teacher's masterpiece together with poetry and prose ranging from Homer to Tacitus *Dialogus de oratoribus* In teasing apart Pliny's rich intertextual weave this book reinterprets Quintilian through the eyes of one of his sharpest readers radically reassesses the *Epistles* as a work of minute textual artistry and makes a major intervention in scholarly debates on intertextuality imitation and rhetorical culture at Rome The result is a landmark study with far reaching implications for how we read Latin literature

Voice, Text, Hypertext Raimonda Modiano, Leroy F. Searle, Peter L. Shillingsburg, 2016-06-01 Voice Text Hypertext illustrates brilliantly why interest in textual studies has grown so dramatically in recent years For the distinguished authors of these essays a text is more than a document or material object It is a cultural event a matrix of decisions an intricate cultural practice that may focus on religious traditions modern underground literary movements poetic invention or the irreducible complexity of cultural politics Drawing from classical Roman and Indian to modern European traditions the volume makes clear that to study a text is to study a culture It also demonstrates the essential importance of heightened textual awareness for contemporary cultural studies and critical theory and indeed for any discipline that studies human culture

Dada 1916 in Theory Dafydd Jones, 2014-06-19 This book presents theoretical engagements with Dada the cultural formation routinely characterised as revolutionary in order to contest perpetuated assumptions that underlie the popular myth

Cyberteaching Morriss Henry Partee, 2002 The advances in communication technology over the past few years offer an unparalleled opportunity for almost every dedicated teacher to reach students in new and powerful ways The necessary hardware to create a classroom in cyberspace probably sits on the instructor's desk right now a computer connected to a network Moreover increasingly user friendly software insures that the instructor does not need sophisticated technical skills in order to embrace these innovative pedagogical techniques The efficiency of electronic communication allows average teachers to become good and good teachers to become superb Cyberteaching addresses the vast numbers of non technically oriented faculty and administrators in institutions of public and especially higher education

Reading Cultures Molly Abel Travis, 1998 Molly Abel Travis unites reader theory with an analysis of historical conditions and various cultural contexts in this discussion of the reading and reception of twentieth century literature in the United States Travis moves beyond such provisional conclusions as the text produces the reader or the reader produces the text and considers the ways twentieth century readers and texts attempt to constitute and

appropriate each other at particular cultural moments and according to specific psychosocial exigencies She uses the overarching concept of the reader in and out of the text both to differentiate the reader implied by the text from the actual reader and to discuss such in and out movements that occur in the process of reading as the alternation between immersion and interactivity and between role playing and unmasking Unlike most reader theorists Travis is concerned with the agency of the reader Her conception of agency in reading is informed by performance psychoanalytic and feminist theories This agency involves compulsive reiterative performance in which readers attempt to find themselves by going outside the self engaging in literary role playing in the hope of finally and fully identifying the self through self differentiation Furthermore readers never escape a social context they are both constructed and actively constructing in that they read as part of interpretive communities and are involved in collaborative creativity or what Kendall Walton calls collective imagining

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society Three decades of societal and cultural alignment of new media yielded to a host of innovations trials and problems accompanied by versatile popular and academic discourse New Media Studies crystallized internationally into an established academic discipline which begs the question where do we stand now which new issues have emerged now that new media are taken for granted and which riddles remain unsolved and is contemporary digital culture indeed all about you or do we still not really understand the digital machinery and how it constitutes us as you From desktop metaphors to Web 2.0 ecosystems from touch screens to blogging to e learning from role playing games to Cybergoth music to wireless dreams this timely volume offers a showcase of the most up to date research in the field from what may be called a digital materialist perspective

The Digital Reading Condition Maria Engberg, Iben Have, Birgitte Stougaard Pedersen, 2022-12-30 This volume offers a critical overview of digital reading practices and scholarly efforts to analyze and understand reading in the mediatized landscape Building on research about digital reading born digital literature and digital audiobooks The Digital Reading Condition explores reading as part of a broader cultural shift encompassing many forms of media and genres Bringing together research from media and literary studies digital humanities scholarship on reading and learning as well as sensory studies and research on multimodal and multisensory media reception the authors address and challenge print biased conceptions of reading that are still prevalent in research whether the reading medium is print or digital They argue that the act of reading itself is changing and rather than rejecting digital media as unsuitable for sustained or focused reading practices they argue that the complex media landscape challenges us to rethink how to define reading as a mediated practice Presenting a truly interdisciplinary perspective on digital reading practices this volume will appeal to scholars and graduate students in communication media studies new media and technology literature digital humanities literacy studies composition and rhetoric

Writing Space Jay David Bolter, 2001-01-01 This second edition of Jay David Bolter's classic text expands on the objectives of the original
