*Electrostatics 1987, Invited and Contributed Papers from the Seventh INT Conference on Electrostatic Phenomena, Oxford, April 1987* J. L. Sproston, 1987 The Seventh International Conference on Electrostatics was held at St Catherine's College Oxford from 8-10 April 1987. The conference attracted delegates from no fewer than 16 countries and over 50 papers were presented. These proceedings contain 57 invited and contributed papers including the Bill Bright Memorial Lecture which opened the conference. The proceedings are arranged in several sections which reflect the organisation of the conference: applications, hazards, simulation and fundamentals, poster session, electrostatic damage and related effects, hazards, applications, measurements and testing, poster session and measurements and fundamentals. Transcription of the discussions which took place after each session are also included. These proceedings therefore provide a valuable overview of the most recent developments in electrostatics and point the way towards areas of future research. **Electrostatics**, 1987

Its programme covers the whole range of nuclear physics and some application such as relativistic nuclear collisions, mesons and baryons in nuclei, hadron structure and quarks in nuclei, formation and properties of hot nuclei, nuclear reactions at low and intermediate energy, nuclear structure, radioactive nuclear beams, nuclear astrophysics, fundamental interaction and symmetries, experimental technique and new facilities and applied nuclear physics. The proceedings is a collection of all invited talks on the plenary and parallel sessions. Presented by the leading scientists in their fields, these talks summarized the most recent progress and future prospects in all the aspects of nuclear physics. *British Book News* British Council, 1988 Includes no 53a British wartime books for young people *Powder Coatings* Tosko Aleksandar Misev, 1991-03-29 Thirty years have passed since the appearance of the first powder coating. A growing number of industries are currently having to adopt non-polluting systems due to concerns for the environment and new emissions regulations. These changes have brought about an increased use of organic powder coatings. It summarizes the rapid developments and achievements of the last two decades. Emphasizing the chemistry and film formation of thermosetting powder coatings, it covers the parameters that influence powder coating properties, the technology of powder coating production and application techniques. There is also discussion of potential future developments in powder coatings with respect to binders, improved production and application techniques and the powder coatings market. *Fundamentals of Adhesion* L.H.
