Excerpt from *An Elementary Old English Grammar Early West Saxon* Old English Grammar has hitherto been taught in three ways which may be called respectively the Germanic the Gothic and the independent methods Sievers assumes that the student possesses a certain knowledge of Germanic and makes it the basis of his classifications Cosijn believes that the ready way to the Old English tongue is to learn Gothic first a theory not difficult to reduce ad absurdum Sweet considers such methods as these positively injurious he prefers to give the learner a thousand and one isolated facts and carefully to withhold every clue by which they may be grouped classified and remembered The method followed in this work is more or less novel being a compromise between Sievers and Sweet an attempt to hit the happy mean for while the basis of arrangement has been the practical convenience of the learner in studying the actually existing phenomena of the language no pains have been spared in order that he may have nothing to unlearn in the further pursuit of the subject Some empirical rules are given but they are of a quiet harmless sort Germanic has been taken as a guide throughout although it is not needlessly obtruded A few difficulties have necessarily been deferred to a later stage About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [An Elementary Old English Grammar \(early West Saxon\), by A.
