**Problem Solving in Geography** J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry level graduate students with limited backgrounds in statistical analysis and methods McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including

probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation

Elementary Statistics Using SAS Sandra D. Schlotzhauer, 2015-05-05 Bridging the gap between statistics texts and SAS documentation Elementary Statistics Using SAS is written for those who want to perform analyses to solve problems The first section of the book explains the basics of SAS data sets and shows how to use SAS for descriptive statistics and graphs The second section discusses fundamental statistical concepts including normality and hypothesis testing The remaining sections of the book show analyses for comparing two groups comparing multiple groups fitting regression equations and exploring contingency tables For each analysis author Sandra Schlotzhauer explains assumptions statistical approach and SAS methods and syntax and makes conclusions from the results Statistical methods covered include two sample t tests paired difference t tests analysis of variance multiple comparison techniques regression regression diagnostics and chi square tests Elementary Statistics Using SAS is a thoroughly revised and updated edition of Ramon Littell and Sandra Schlotzhauer's SAS System for Elementary Statistical Analysis This book is part of the SAS Press program

Aspects of Statistical Inference A. H. Welsh, 2011-09-15 Relevant concrete and thorough the essential data based text on statistical inference The ability to formulate abstract concepts and draw conclusions from data is fundamental to mastering statistics Aspects of Statistical Inference equips advanced undergraduate and graduate students with a comprehensive grounding in statistical inference including nonstandard topics such as robustness randomization and finite population inference A H Welsh goes beyond the standard texts and expertly synthesizes broad critical theory with concrete data and relevant topics The text follows a historical framework uses real data sets and statistical graphics and treats multiparameter problems yet is ultimately about the concepts themselves Written with clarity and depth Aspects of Statistical Inference Provides a theoretical and historical grounding in statistical inference that considers Bayesian fiducial likelihood and frequentist approaches Illustrates methods with real data sets on diabetic retinopathy the pharmacological effects of caffeine stellar velocity and industrial experiments Considers multiparameter problems Develops large sample approximations and shows how to use them Presents the philosophy and application of robustness theory Highlights the central role of randomization in statistics Uses simple proofs to illuminate foundational concepts Contains an appendix of useful facts concerning expansions matrices integrals and distribution theory Here is the ultimate data based text for comparing and presenting the latest approaches to statistical inference
