Young, 2018-06-05 *Mind over Magma* chronicles the scientific effort to unravel the mysteries of rocks that solidified on or beneath Earth's surface from the intensely hot molten material called magma. The first ever comprehensive history of the study of such igneous rocks, it traces the development of igneous petrology from ancient descriptions of volcanic eruptions to recent work incorporating insights from physical chemistry, isotope studies, and fluid dynamics. Intellectual developments in the field from the application of scientific methods to the study of rocks to the discovery of critical data and the development of the field's major theories are considered within their broader geographical, social, and technological contexts. *Mind over Magma* examines the spread of igneous petrology from western Europe to North America, South Africa, Japan, Australia, and much of the rest of the world. It considers the professionalization and Anglicization of the field, detailing changes in publication outlets, the role of women, and the influence of government funding. The book also highlights the significant role that technological developments, including the polarizing microscope, high temperature quenching furnaces, and instrumental analysis, have played in the discovery of new data and development of revolutionary insights into the nature of igneous rocks. Both an engagingly told story and a major reference, *Mind over Magma* is the only available history of this important field. As such, it will be appreciated by petrologists, geochemists, and other geologists as well as by those interested in the history of science. *The Geology of Ben Nevis and Glen Coe and the Surrounding Country* Edward Battersby Bailey, Herbert Brantwood Maufe, 1916 Hand Catalogue of the Edinburgh University Library, 1906 *Bulletin of the United States Geological Survey*, 1949 Bulletin of the United States Geological Survey Geological Survey (U.S.), 1906 **Annual Report of the United States Geological Survey to the Secretary of the Interior** Geological Survey (U.S.), 1900 *Slate Deposits and Slate Industry of the United States* Thomas Nelson Dale, 1906 *Annual Report* Geological Survey (U.S.), 1899 *Mineral Resources of Kenai Peninsula, Alaska* Arthur James Collier, Charles Butts, Fred H[oward] Moffit, Louis M[arcus] Prindle, Samuel Stinson Gannett, Thomas Nelson Dale, Frank Lee Hess, 1907 *Bulletin*, 1924 *Geological Magazine* Henry
