Habituation, Sensitization, and Behavior Harman Peeke, 2012-12-02 Habituation Sensitization and Behavior reviews some of the important advances that have been made toward understanding the mechanisms underlying and the significance of the phenomena traditionally associated with habituation sensitization and behavior in intact organisms Habituation and sensitization are used to refer to underlying theoretical processes and behavior changes are described at the response level Comprised of 12 chapters this book begins with an overview of approaches constructs and terminology used in the study of response change in the intact organism The

discussion then turns to a two factor dual process theory of habituation and sensitization together with a theory of the mechanism of habituation that emphasizes the assignment of responses to stimuli Subsequent chapters explore the link between memory and habituation statistical strategies for analyzing repeated measures data cellular approaches used in the analysis of habituation and sensitization in Aplysia and intrinsic and extrinsic mechanisms of habituation and sensitization The habituation of central nervous system evoked potentials is also considered with particular reference to intrinsic habituation in the neocortex allocortex and mesencephalon The final chapter is devoted to evolutionary determination of response likelihood and habituation This monograph should be of interest to practitioners in the fields of behavioral biology psychobiology psychology and psychiatry **Annals of Theoretical Psychology** Joseph R. Royce, Leendert P.

Mos, 2013-11-11 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate commentary If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views elsewhere in print K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground
