The Architecture of the British Library at St. Pancras Roger Stonehouse, Gerhard Stromberg, 2004-08-02 In a series of interrelated essays this book describes the British Library and the issues surrounding its design construction purpose and place in the architectural canon Examining the experience of the building together with its form these essays explore the ideas and aspirations behind its conception and its construction offering insight into this striking controversial and stimulating building For artists architects and building professionals interested in the current debates concerning architecture and our culture The Architecture of the British Library at St Pancras is a stimulating read

**Architectural System Structures** Kasper Sánchez Vibæk, 2014-06-20 This book proposes a system structure in architectural design that conceptualises a systemic level in architecture and construction that lies between general construction techniques and specific architectural results In order to make such a system structure operational the elaboration of a model seeks on the one hand to analytically grasp and on the other hand to make it possible to actively work with system structures as part of architectural design Kasper Sanchez Vibaek s ambition is to bridge an apparent and increasing gap between architectural ideation and the way these ideas are brought to life as real physical manifestations of our built environment In line with the so called systems sciences the book rejects the prevalent scientific view that the degree of detail automatically enhances understanding and explanative power of complex phenomena It establishes the idea of a systems view on buildings and architectural design that through the use of flexible constituent elements facilitates discussion and decision making about how architectural wholes are appropriately put together as assemblages of what the current and future building industry is capable of producing Based on several years of detailed research into the architectural consequences of construction when exposed to industrialised production techniques and systems Architectural System Structures represents a new way to look at what is already there and is useful for all those interested in the processes of architectural creation and realisation specifically attached to time place and cultural context
