Policy Studies Review Annual Ray C. Rist, 1986-08-01 In the tradition of the Policy Studies Review Annual series, Volume Eight continues to offer the best of recent writing and analysis in a number of policy-relevant areas. Indeed, reflecting the shifting nature of policy debates and public attention, Volume Eight has introduced seven entirely new substantive areas, including such sensitive issues as the viability of the safety net, information policy, work and labor policy, immigration policy, and environmental policy. The volume is also characterized by explicit attention to two critical aspects of the policy analysis: craft the strengths and weaknesses of various methodological approaches and the role of noneconomic factors. Should they play in economic policy analysis? Drawing from such public sector administrators as William Ruckelshaus and Eleanor Chelmsky, academic policy analysts such as Martin Feldstein and Irving Louis Horowitz, and two congressional support agencies, CBO and GAO, the volume provides the most timely and relevant assessments of current policy issues. It also provides the reader with a framework within which to approach substantive areas as widely disparate as national security and health care. The volume is an indispensable tool for those who seek to sort through the confusions and contradictions of present policy statements in order to gain a cogent view of how these and other issues are framed and what viable policy options are available. **Contents:** PARTIAL METHODS FOR POLICY ANALYSIS S. Roe Goddard, 2017-10-10 This book first published in 1993 closely examines the United States government's policy toward the Latin American debt crisis in the years 1982 to 1985 The United States under Reagan sought to maintain the problem as strictly a private creditor debtor issue and avoided the internationalization of the problem With the election of Bush however government policy changed in 1989 and this book analyses the different approaches of both administrations the successes and failures of their policies and the eventual resolution of the debt crisis
