Emerging Perspectives on Gesture and Embodiment in Mathematics Laurie D. Edwards, Deborah Moore-Russo, Francesca Ferrara, 2014-07-01 The purpose of the book is to establish a common language for and understanding of embodiment as it applies to mathematical thinking and to link mathematics education research to recent work in gesture studies cognitive linguistics and the theory of embodied cognition Just as in past decades mathematics education experienced a turn to the social in which socio cultural factors were explored in recent years there has been a nascent turn to the body An increasing number of researchers and theorists in mathematics education have become interested in the fact that although mathematics may be socially constructed this construction is not arbitrary or unconstrained but rather is rooted in and shaped by the body All those who engage with mathematics whether at an elementary or advanced level share the same basic biological and cognitive capabilities as well as certain common physical experiences that come with being humans living in a material world In addition the doing and communicating of mathematics is never a purely intellectual activity it involves a wide range of bodily actions from committing inscriptions to paper or whiteboard to speaking listening gesturing and gazing This volume will present recent research on gesture and mathematics

within a framework that addresses several levels of mathematical development The chapters will begin with contributions that examine early mathematical and proto mathematical knowledge for example the conservation of volume and counting The role of gesture in teaching and learning arithmetic procedures will be addressed Core concepts and tools from secondary level mathematics will be investigated including algebra functions and graphing And finally research into the embodied understanding of advanced topics in geometry and calculus will be presented The overall goal for the volume is to acknowledge the multimodal nature of mathematical knowing and to contribute to the creation of a model of the interactions and mutual influences of bodily motion spatial thinking gesture speech and external inscriptions on mathematical thinking communication and learning The intended audience is researchers and theorists in mathematics education as well as graduate students in the field

Answers to Real Problems: Harry Emerson Fosdick Speaks to Our Time Harry Emerson Fosdick, 2008-07-01 Harry Emerson Fosdick 1878 1969 was one of the most influential preachers in the twentieth century He believed every sermon ought ask and answer some question that genuinely troubles individuals or the societies of which they are a part *Answers to Real Problems* gathers several significant sermons from Fosdick's long ministry The selection is rooted in current needs This collection presents him asking and answering questions that still weigh or ought to weigh on the minds of people today Here is one of America's finest preachers talking about war nationalism the relationship between liberals and conservatives the plight of the church public ethics private morality and more *Image and Hope*

Yaroslav Viazovski, 2016-02-25 Developments in biblical studies neurosciences and Christian philosophy of mind force theologians to reconsider the traditional concept of the immortal soul At the same time the concept itself tends to create axiological dualism between the body and the soul that in turn may lead to insufficient appreciation of the physical life in this world A more holistic approach to the ontology of human beings is required The aim of this study is to analyse the function of the concept of the soul in the dualistic anthropology of John Calvin and to compare it to the holistic anthropology of Karl Barth in order to answer the question of whether the transition from one to the other is possible without the loss of the functions fulfilled by the soul *The Real Man's Guide to Fixin' Stuff* Nick Harper, 2010 The ultimate guide shows guys how to fix all those ordinary things that break every day which no one seems to do know what to do with

Simpson Sócrates Nolasco,2017-06-09 Men have lower life expectancy than women they account for 90% of the incarcerated population they die more often in traffic accidents from alcohol and drug consumption and they commit more suicides than women Since that information has been accessible for a long time why is it not taken into account when campaigns are created and actions are defined Violence is not an entity it is male Confronted with that reality the author sought to formulate the question orientating towards the following working hypothesis this common knowledge should be forgotten given that the involvement of men in situations of violence plays an important role in the preservation of political ideation in contemporary societies During this study it became clear that men are exposed to a more complex type of death than mere physical death but just as important which is relative to their social representation This insight led to understanding other aspects that could be associated with men s intense involvement in situations of violence Could it be that in contemporary culture a purpose is served by keeping men involved with situations of violence If so what might that be

The Origin of Christian Science Thomas Polhill Stafford,2021-04-11 In The Origin of Christian Science Thomas Polhill Stafford meticulously examines the historical roots and theological underpinnings of this pivotal movement within American religious thought Through a detailed analytical lens Stafford explores the life and teachings of Mary Baker Eddy whose foundational ideas transformed the landscape of spirituality in the late 19th century The book s literary style is both rigorous and accessible combining scholarly footnotes with narrative prose that invites readers into the complexities of Christian Science s development against the backdrop of contemporary religious movements such as Transcendentalism and

Spiritualism Thomas Polhill Stafford an esteemed historian and theologian draws from his extensive background in religious studies and personal interest in alternative spiritualities to craft this volume His scholarly approach is informed by a deep understanding of the socio cultural context of the time as well as a sincere inquiry into how Christian Science has sought to redefine the relationship between health spirituality and social obligation Stafford s insights are anchored in both primary sources and secondary literature enriching the reader s grasp of the subject matter This book serves as an essential resource for students of religious studies historians and those interested in the intersections of faith and healing Stafford s engaging narrative and informed critique will not only illuminate the origins of Christian Science but also encourage readers to reflect on its relevance in modern spiritual discourse Highly recommended for anyone seeking a deeper understanding of this influential movement
