Elephant Woman Cynthia Moss Explores The World Of Elephants:

Elephant Woman Laurence Pringle, 1997 Tradition is a central concept in the social sciences but it is commonly treated as unproblematic Dr Boyer insists that social anthropology requires a theory of tradition its constitution and transmission He treats tradition as a type of interaction which results in the repetition of certain communicative events and therefore as a form of social action Tradition as Truth and Communication deals particularly with oral communication and focuses on the privileged role of licensed speakers and the ritual contexts in which certain aspects of tradition are characteristically transmitted Drawing on cognitive psychology Dr Boyer proposes a set of general hypotheses to be tested by ethnographic field research He has opened up an important new field for investigation within social anthropology

Elephant Memories Cynthia Moss, 2012-08-06 A style so conversational that I felt like a privileged visitor riding beside her in her rickety Land Rover as she showed me around the park The New York Times Book Review Cynthia Moss spent many years living in Kenya's Amboseli National Park and studying the elephants there and her long term research has revealed much of what we now know about these complex and intelligent animals In this book she shares a more up close and personal perspective chronicling the lives of the elephant families led by matriarchs Teresia Slit Ear Torn Ear Tania and Tuskless including a rare look at calves and their development This edition is also updated with a new afterword catching up on the families covering current conservation issues and celebrating a species from which we could learn some moral as well as zoological lessons Chicago Tribune One is soon swept away by this Babar for adults By the end one even begins to feel an aversion for people One wants to curse human civilization and cry out Now God stand up for the elephants The New York Times Moss speaks to the general reader with charm as well as scientific authority An elegantly written and ingeniously structured account The Wall Street Journal Any reader interested in animals will be captivated Publishers Weekly

A Passion for Elephants Toni Buzzeo, 2015-09-29 A science and nature biography of Cynthia Moss the elephant expert by the author of Caldecott Honor book *One Cool Friend* Cynthia Moss was never afraid of BIG things As a kid she loved to ride through the countryside on her tall horse She loved to visit faraway places And she especially loved to learn about nature and the world around her So when Cynthia traveled to Africa and met the world's most ENORMOUS land animal the African elephant at Amboseli National Park in Kenya she knew she had found her life's work Cynthia has spent years learning everything she can about elephants and sharing these fascinating creatures with the world She is a scientist nature photographer and animal rights activist fighting against the ivory poachers who kill so many elephants for their tusks This lyrical and accessible picture book gives kids a glimpse of what scientists do in the real world and inspires them to dream of accomplishing BIG things

The Astonishing Elephant Shana Alexander, 2000 Physiologically elephants are unique entirely different from all other mammals Yet since antiquity observers have agreed that the elephant is the animal most akin to man Today both species of elephant Africans and Asians stand on the brink of extinction Hope is arising however from a new generation of young

American scientists many of them women Female zoologists and biologists have led the field in new findings about elephant ecology family and sexual patterns and the animals continual communication by ultrasound inaudible to human ears The Astonishing Elephant also reveals for the first time a hair raising story of elephant genocide in the years between the Civil War and World War I all male elephants in U S circuses were stealthily killed shot poisoned drowned and even hanged The reason was musth a periodic condition of mature males that renders them uncontrollable So gradually only female elephants now with masculine names were put on parade with none the wiser Most important The Astonishing Elephant details a decade of heartbreaking trial and error and eventual triumph as scientists have tried to learn how to breed elephants via artificial insemination BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Elephant Talk Ann Downer,2017-01-01 On a hot day in the African savannah a group of elephants searches for food While foraging they often lose sight of one another Yet at the end of the day in one coordinated movement the elephants suddenly regroup This coordinated movement and others like it has puzzled scientists and caused them to question how elephants communicate with each other Since the 1990s scientists have gathered significant data on elephant talk Biologists have determined that elephants use a complex system of communication of at least ten distinct sounds combined in many variations Researchers are now asking what do these sounds mean As scientists study the elephant sounds that humans can hear they are also identifying ways elephants communicate through nonverbal behaviors and making sounds too low for human ears Scientists have realized that elephants even receive messages by using their sensitive feet to feel vibrations in the ground All of these discoveries are helping elephant researchers better understand elephant behavior But the elephant s time as a wild animal is running out Threatened by habitat loss and illegally hunted for their ivory tusks elephants are on the brink of extinction Will understanding elephant talk be the key to saving the species *Venture Into Cultures* Olga R.

Women of Discovery Milbry Polk, Mary Tiegreen, 2001 Across the centuries and from many lands women have set forth on journeys of exploration Visionaries adventurers artists and scientists these women challenged the limitations both physical and social of their times and in the face of formidable challenges expanded the world's body of knowledge Yet despite their extraordinary achievements they have remained unknown and unsung for too long No longer The stories of more than eighty extraordinary explorers and adventurers are vividly recounted and stunningly illustrated in Women of Discovery Here for the first time are gathered the tales of early voyagers such as the valiant tenth century Viking adventurer Unn the Deep Minded and

seventeenth century Spanish conquistadora Catalina de Erauso Intrepid explorers like Mary Kingsley in Africa Alexandra David Neel in Tibet and Freya Stark in the Middle East traveled fearlessly into the blank spaces on the map Artist explorers including the great botanical painter Anna Maria Sibylla Merian in Surinam writer Zora Neale Hurston in Haiti and photographer Ruth Robertson in South America captured in their art the beauty and mystery of exotic lands Many brave women have ventured into extreme environments to bring back knowledge whether they were aviators like Amelia Earhart mountaineers like Annie Smith Peck or Arctic explorers like Irina and Valentina Kuznetsova And the annals of science would be far poorer without the work of such women as primatologists Jane Goodall and Dian Fossey ethnobotanist Nicole Maxwell and ichthyologist Eugenie Clark This is truly a gathering of heroines full of tales of courage talent intelligence and sheer determination With a foreword by renowned journalist Christiane Amanpour *Women of Discovery* is a remarkable book an achievement in its own right and certain to thrill anyone captivated by the world changing drama of exploration
