The Secret Elephants Gareth Patterson, 2012-09-28 The elephants of the Knysna forest have long been the subject of mystery and conjecture Over the years they have taken on an almost mythical quality with many doubting whether they existed at all In 1994 the local forestry department maintained that there was only one surviving Knysna elephant the seldom seen female known as The Matriarch The Knysna elephant was thus described as functionally extinct This was the official stance until September 2000 when forest guard Wilfred Oraai encountered and photographed a young bull from a distance of some thirty metres The question arose who was its mother And indeed who was its father In 2001 Gareth Patterson began an independent study of the Knysna elephant For the next seven years he covered thousands of kilometres on foot following ancient elephant paths through the dense Afromontane forest and the surrounding mountain fynbos He found abundant signs to suggest that far from dying out the Knysna elephants are quietly and secretly holding their own Patterson's fieldwork and his dna research in collaboration with conservation geneticist Lori Eggert established that at least five young females exist lending support to Patterson's growing evidence that the Knysna forest and its surroundings are home to a small herd of young elephants *The Secret Elephants* is the story of these remarkable animals that fought their way back from the brink of extinction without any help from humankind **Proceedings of the Third International Congress**

entertainment between 1800 and 1940 By developing a deeper understanding of animal behavior Nance asserts we can more fully explain the common history of all species Entertaining Elephants is the first account that uses research on animal welfare health and cognition to interpret the historical record examining how both circus people and elephants struggled behind the scenes to meet the profit necessities of the entertainment business The book does not claim that elephants understood endorsed or resisted the world of show business as a human cultural or business practice but it does speak of elephants rejecting the conditions of their experience They lived in a kind of parallel reality in the circus one that was defined by their interactions with people other elephants horses bull hooks hay and the weather Nance s study informs and complicates contemporary debates over human interactions with animals in entertainment and beyond questioning the idea of human control over animals and people s claims to speak for them As sentient beings these elephants exercised agency but they had no way of understanding the human cultures that created their captivity and they obviously had no claim on human social and political power They often lived lives of apparent desperation
