

Elephants have lived on earth for a long time. The first elephants in today's elephants lived 65 million years ago. It looked very different from modern elephants. It was only about two feet high, and it didn't have a trunk. It had tiny ears and its teeth were small. Scientists gave this little animal the big name of *Mastodons*.

After *Mastodons*, more than 100 other varieties of elephants roamed the earth. They appeared in different sizes and with a wide variety of trunk and

tusk styles. Today, all of these early elephants are gone. The African and Asian elephants are the only elephants left.

Can you find *Mastodons* on these pages? Do you see the really mammoth, the closest

relative of modern elephants? Which elephant ancestor had the longest trunk? Which of these prehistoric elephants do you think looks most like today's elephants?
