Effective Programs For Latino Students:

Effective Programs for Latino Students Robert E. Slavin, Margarita Calderon, Margarita Calderon, 2012-11-12 Latino or Hispanic children are one of the fastest growing groups in U S schools today On average these students perform worse than Anglo students on measures of academic achievement and other measures of academic success and their drop out rate is high There are schools of excellence among those serving Latino children but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural personal and linguistic strengths these children are likely to bring with them to school Schools serving Latino students need programs based on high quality research capable of being replicated and adapted to local circumstances and needs The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades Surprisingly this has not been done before there are many books on the situation of Latino students in U S schools but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students The chapters represent a broad range of methodologies from experimental to correlational to descriptive and the solutions they propose are extremely diverse Each examines in its own way programs and practices that are showing success Together they present a rich array of research based effective programs that are practical widely available and likely to make a profound difference What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve and a shared belief that reform of schools serving many Latino students is both possible and essential This is a book filled with statistics description and reviews of research but even more it is filled with optimism about what schools for Latino students can be and what these students will achieve It is a highly relevant and useful resource for educators policymakers and researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools and beyond **Effective**

Latinos in a Changing Society Edwin Meléndez, Martha Montero-Sieburth, 2007-02-28 Given the importance of Latino issues in the current social and economic times the publication of Latinos in a Changing Society is both timely and prescient in its contributions to the current discourse of how Latinos are being influenced by U S norms and culture and how Latinos are also affecting U S society This volume contributes to our need for comprehensive analysis of how Latin communities compare and contrast with other underserved groups It also examines how changes are taking place within specific Latino groups particularly between first and second generation Cubans returning Puerto Ricans Dominican poverty and emergent Mexican leaders in the New England area The opportunities that Latinos and dominant mainstream interests share are identified in this volume but so are the many areas in need of change In this current atmosphere of anger and suspicion toward immigrants this volume presents

an analytical perspective that is too often absent from politically motivated debates about Latinos and their role in a changing society Undocumented immigrants are often portrayed as people who come to this country to take advantage of a generous welfare system contributing little to the economic and social development of the country This volume critically examines issues such as the Latino commitment to labor participation the ways that Latino parents engage in schools and in their communities health access and social programs the policing concerns within the Latino community the academic adjustments made by Latino college students as well as the educational opportunities that exist for Latinos across the country Unlike publications that seek to summarize knowledge about the Latino population in the United States *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis research and public consciousness needed to advance the educational social cultural and political participation and incorporation of Latinos in the new century This volume critically examines such issues as the disparity in poverty among Latino groups the lack of access to health services the Latino commitment to labor participation the ways that Latino parents engage in schools and in their communities and the educational dropout rates of Latinos across the country and the underlying causes of those rates Unlike publications that seek to summarize knowledge about the Latino population in the United States *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis research and public consciousness needed to advance the educational social cultural and political participation and incorporation of Latinos in the new century

Miramontes, 2006-04-21 *Linguistic Diversity and Teaching* raises questions and provides a context for reflection regarding the complex issues surrounding new English learners in the schools These issues exist within a highly charged political climate and involve not only language but also culture class ethnicity and the persistent inequities that characterize our educational system The text addresses these issues through conversations among experts practitioners and readers that are informed by representative case studies and by a range of theoretical approaches It is designed to engage readers in beginning to evolve their own practical theories to help them explore and perhaps modify some basic beliefs and assumptions and to become acquainted with other points of view Throughout readers are encouraged to interact with the text and to develop their own perspective on the issue of linguistic diversity and teaching This is the fourth volume in *Reflective Teaching and the Social Conditions of Schooling A Series for Prospective and Practicing Teachers* edited by Daniel P Liston and Kenneth M Zeichner It follows the same format as previous volumes in the series Part I includes four cases dealing with different aspects of the impacts of the changing demographics of public schools Each case is followed by space for readers to write their own reactions and reflections and a set of reactions to the cases written by prospective and practicing teachers administrators and professors Part II presents three public arguments representing very different views about linguistic diversity in public schools English should be the only language of instruction all children should receive instruction in both their first language and English planning for instruction should be based not on absolutes

but on what is realistically possible in particular settings Part III offers the authors own interpretations of the issues raised throughout the text outlines a number of ways in which teachers can continue to explore these topics and includes exercises for further reflection A glossary and annotated bibliography are provided This text is pertinent for all prospective and practicing teachers at any stage of their training It can be used in any undergraduate or graduate course that addresses issues of language diversity and teaching
