

Soil, land and climate change

Soil contains significant amounts of carbon and nitrogen, which can be released into the atmosphere depending on how we use the land. Clearing or planting forests, the melting of permafrost can tilt the greenhouse gas emission balance one way or the other. Climate change can also substantially alter what farmers can produce and where.

Effects Of Land Use Change On Atmospheri:

Effects of Land-Use Change on Atmospheric CO₂ Concentrations Virginia H. Dale, 2012-12-06 Roger C Dahlman
Environmental Sciences Division U S Department of Energy Washington D C The potential for humans to alter Earth s atmosphere has been recognized since the end of the 19th century when Arrhenius estimated that a doubling of atmospheric carbon dioxide could alter the atmospheric radiation balance and raise average global temperature Today atmospheric CO concentrations play an important part in the 2 climate change debate Sources and sinks of CO associated with land use can be 2 significant determinants of the rate and magnitude of atmospheric CO change 2 Combustion of fossil fuels and the deforestation associated with land use change both contribute CO to the atmosphere in contrast biological processes on land create 2 potential sinks for the excess CO Thus land use change and associated biological 2 processes become important elements in assessments of future atmospheric CO 2 increase land cover properties also affect the Earth s albedo which is a climate feedback

Impacts of Land-use Change on Ecosystem Services Jinyan Zhan, 2015-08-10 This book aims to systematically elaborate how land use change directly or indirectly exerts impacts on the ability of ecosystems to provide services for human society The relationship between land use ecosystem services and human well being is a hot topic and there have been some important achievements in this field but its continuing growth means that it warrants further research The unique viewpoint the scientific analysis methods and the precise language of this book make it not only a valuable guide for professors conducting research but also a reference resource to help governments make decisions on relevant policies Prof Jinyan Zhan is an associate professor at the School of Environment Beijing Normal University China

Land Use Impacts on Climate Xiangzheng Deng, Burak Güneralp, Jinyan Zhan, Hongbo Su, 2014-06-11 This book introduces a key issue in research on the climatic impact of land cover and land use changes via terrestrial biogeophysical processes The parameterization of surface processes and a systematic approach to modeling the climatic impacts of land use change are discussed respectively and can be used to improve parameterization schemes for climate numerical models and to provide a systematic method thus offering more scientific and enhanced support for research on the climatic effects of land use cover change Further based on predictions and scenario analyses of land use changes in typical zones the climatic impact of various types of changes in different areas can be simulated through climatic numerical modeling the simulation results are suitable for use in climate mitigation land use planning urban development planning etc Thus the book is intended for researchers and professionals working in the area of meteorology systems climatic numerical modeling climate change and land use cover change as well as decision makers in meteorology and land use planning Professor Xiangzheng Deng is a senior research fellow at the Institute of Geographical Sciences and Natural Resources Research Chinese Academy of Sciences

Global Environmental Change and Land Use H.J.T.M. Haarman, Jan Verhagen, C.A. Rovers, 2003-06-30 The interaction between environmental change and human activities is complex requiring the concepts and tools of a number of disciplines for its effective analysis Land use and land cover change has only recently become a topic susceptible to scientific research as these concepts and tools have been developed and made available Rooted in a broad community concerned with global change systematic research has begun into land use systems at different scales and interactions and their links with global cycles of water nitrogen and carbon are being explored Partly based on research initiated by the Dutch National Research Programme on Global Air Pollution and Climate Change NRP this book touches upon various land use and land cover issues in relation to global environmental change In addition to the biogeochemical cycles land as a carrier for functions of economic activities food and fibre production and energy production via biomass are discussed Crucial in studying land use is human behaviour and man environment interaction at different scales Land use and land cover change is an important contributor of greenhouse gases as these activities directly interfere with the carbon nitrogen and water cycles These cycles are connected through numerous feedback loops The interface of land use and climate is essentially determined by the interaction of man and the environment Man uses land primarily to produce food a relatively small area is needed for urban development

Atmospheric Chemistry in a Changing World Guy P. Brasseur, Ronald G. Prinn, Alexander A.P. Pszenny, 2012-12-06 Praise for Guy P Brasseur's Atmospheric Chemistry in a Changing World American Meteorological Society This volume summarizes and integrates more than a decade of atmospheric chemistry research During the period under consideration great progress has been made in computing modeling and observational techniques and methods have also improved Here suggestions for the highest priority research for the next decade are made and important information is related regarding impacts on the environment

scientific assessment of the multiple interactions between climate change and land assessing climate change desertification land degradation sustainable land management food security and greenhouse gas fluxes in terrestrial ecosystems It assesses the options for governance and decision making across multiple scales It serves policymakers decision makers stakeholders and all interested parties with unbiased up to date policy relevant information This title is also available as Open Access on Cambridge Core

Land-Use and Land-Cover Change Eric F. Lambin, Helmut J. Geist, 2008-01-08 This book presents recent estimates on the rate of change of major land classes Aggregated globally multiple impacts of local land changes are shown to significantly affect central aspects of Earth System functioning The book offers innovative developments and applications in the fields of modeling and scenario construction Conclusions are also drawn about the most pressing implications for the design of appropriate intervention policies

Human Impacts on Weather and Climate William R. Cotton, Roger A. Pielke, Sr, 2007-02-01 This 2007 edition of Human Impacts on Weather and Climate examines the scientific and political debates surrounding anthropogenic impacts on the Earth's climate and presents the most recent theories data and modeling studies The book discusses the concepts behind deliberate human attempts to modify the weather through cloud seeding as well as inadvertent modification of weather and climate on the regional scale The natural variability of weather and climate greatly complicates our ability to determine a clear cause and effect relationship to human activity The authors describe the basic theories and critique them in simple and accessible terms This fully revised edition will be a valuable resource for undergraduate and graduate courses in atmospheric and environmental science and will also appeal to policy makers and general readers interested in how humans are affecting the global climate

The Climate Report U.S. Global Change Research Program, 2019-01-22 To hide its dramatic findings the government quietly released its mandated Climate Assessment Report on Black Friday 2018 Now this full color reproduction is the definitive edition of the most comprehensive assessment of the effects of climate change on the United States The New York Times which every citizen should own The US Global Change Research Program USGCRP is mandated by law at least every four years to submit to the president and the Congress an assessment regarding the findings of the effects of global change and current and major long term trends in global change The report was released by the Trump administration without fanfare in the wake of a series of some of the most devastating hurricanes in American history as well as the horrific California wildfires As the report says The assumption that current and future climate conditions will resemble the recent past is no longer valid Detailing not only the destructive toll of global warming on the environment but also the related health issues leading to tens of thousands of deaths per year and economic losses of tens of billions of dollars the report concludes that The evidence of human caused climate change is overwhelming and continues to strengthen that the impacts of climate change are intensifying across the country and that climate related threats are rising

Modeling the Dynamics and Consequences of Land System Change Xiangzheng Deng, 2011-12-22 Modeling the Dynamics and Consequences of Land System Change introduces an innovative

three tier architecture approach for modeling the dynamics and consequences of land system change It also describes the principle modules and the applications of the three tier architecture model in detail The approach holds strong potential for accurate predictions of the land use structure at the regional level simulating the land use pattern at pixel level and evaluating the consequences of land system change The simulation results can be used for the planning of land use urban development regional development environmental protection and also serve as valuable information for decision making concerning land management and optimal utilization of land resources The book is intended for the researchers and professionals in land use or land systems regional environmental change ecological conservation as well as the land resource administrative agencies and environmental protection agencies Professor Xiangzheng Deng is a senior research fellow at the Institute of Geographic Sciences and Natural Resources Research Chinese Academy of Sciences China
