Eight Adventures For Children:

Eight Adventures for Children Dorothy Willoughby, 1996-01-01 **Children's Catalog of Thirty-five Hundred Books**
H.W. Wilson Company, Corinne Bacon, 1917 *ACTIVITIES FOR CHILDREN IN THERAPY* Susan T. Dennison, Connie M. Knight, 1999-01-01
Activities for Children in Therapy provides the mental health professional with a wide variety of age appropriate activities which are simultaneously fun and therapeutic for the five to twelve year old troubled child. These activities have been designed as enjoyable games that both the therapist and child can play in the context of therapy. This latest edition of the text takes much of the hard work out of planning and implementing this therapy with children. The activities are designed to build a significant child therapist relationship, surface problem areas, aid in resolving those problems, and provide a healthy closure to the therapy relationship. This new edition also provides a comprehensive listing of books with other therapeutic intervention ideas, bibliotherapy materials that compliment the activity chapters of this book, assessment scales for evaluating youngsters at the onset of treatment, and a sample child assessment for individual therapy. It will be of use to professionals who provide counseling to children such as social workers, psychologists, guidance counselors, speech language pathologists, art therapists, and other related professionals.

Risk in Children's Adventure Literature Elly McCausland, 2024-05-31
Risk in Children's Adventure Literature examines the way in which adults discuss the reading and entertainment habits of children and with it the assumption that adventure is a timeless and stable constant whose meaning and value is self-evident. A closer enquiry into British and American adventure texts for children over the past 150 years reveals a host of complexities occluded by the term and the ways in which adults invoke adventure as a means of attempting to get to grips with the nebulous figure of the child. Writing about adventure also necessitates writing about risk, and this book argues that adults have historically used adventure to conceptualise the relationship between children and risk: the risks children themselves pose to society, the risks that threaten their development, and how they can be trained to manage risk in socially normative and desirable ways. Tracing this tendency back to its development and consolidation in Victorian imperial romance and forward through various adventure texts and media to the present day, this book probes and investigates the truisms and assumptions that underlie our generalisations about children's love for adventure and how they have evolved since the mid-nineteenth century.
