Governing Delaware William W. Boyer, 2000 Governing Delaware is an analysis of the governance of Delaware that focuses on the political culture and public policy problems of this small state BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Standards and Their Stories* Martha Lampland, Susan Leigh Star, 2009 Standardization is one of the defining aspects of modern life its presence so pervasive that it is usually taken for granted However cumbersome onerous or simply puzzling certain standards may be their fundamental purpose in streamlining procedures regulating behaviors and predicting results is rarely questioned Indeed the invisibility of infrastructure and the imperative of standardizing processes signify their absolute necessity Increasingly however social scientists are beginning to examine the origins and effects of the standards that underpin the technology and practices of everyday life Standards and

Their Stories explores how we interact with the network of standards that shape our lives in ways both obvious and invisible. The main chapters analyze standardization in biomedical research, government bureaucracies, the insurance industry, labor markets, and computer technology, providing detailed accounts of the invention of standard humans for medical testing and life insurance, actuarial tables, the imposition of chronological age as a biographical determinant, the accepted means of determining labor productivity, the creation of international standards for the preservation and access of metadata, and the global consequences of ASCII imperialism and the use of English as the lingua franca of the Internet. Accompanying these in-depth critiques are a series of examples that depict an almost infinite variety of standards, from the controversies surrounding the European Union's supposed regulation of banana curvature to the minimum health requirements for immigrants at Ellis Island, conflicting and ever-increasing food portion sizes, and the impact of standardized punishment metrics like Three Strikes laws. The volume begins with a pioneering essay from Susan Leigh Star and Martha Lampland on the nature of standards in everyday life that brings together strands from the several fields represented in the book. In an appendix, the editors provide a guide for teaching courses in this emerging interdisciplinary field, which they term infrastructure studies, making *Standards and Their Stories* ideal for scholars, students, and those curious about why coffins are becoming wider, for instance, or why the Financial Accounting Standards Board refused to classify September 11 as an extraordinary event.

Encyclopedia of Human Development Neil J. Salkind, 2006. Publisher description: Population Change in the United Kingdom Tony Champion, Jane Falkingham, 2016-07-27. A quarter of a century ago, Heather Joshi edited a landmark volume sponsored by the British Society for Population Studies and the Centre for Economic Policy Research, entitled *The Changing Population of Britain*. In 2014-15, to mark the 25th anniversary of this book, the BSPS teamed up with the British Academy to hold a series of events on population developments in the UK and the policy issues that they raise, and has built on these presentations to produce a new edited collection on the changing population of the UK. This book shows that the UK's population is increasing faster than at any point in the last 100 years; it is getting progressively older, and it is becoming more diverse culturally and ethnically. More school leavers are going on to university. Cohabitation has been replacing marriage; more children live in one-parent families, and young adults are finding it harder to get on the property ladder. Many women are delaying having children until their 40s. Cities have seen a resurgence in population, but there is still pressure on the countryside, while the north-south divide is getting ever wider, as too are local socio-economic disparities. The contributors to this book document these changes, examine their causes, and discuss future prospects and their policy implications.

Citizenship and Social Rights Fred Twine, 1994-09-06. This broad-ranging text offers an analysis of the idea of citizenship and its relevance to social problems and social policies in advanced industrial societies. Twine demonstrates that two concepts are essential to an understanding of the issue of citizenship: the socially embedded nature of human agents and their interdependence both with each other and with the natural and social worlds they inhabit. Twine emphasizes the social

nature of individual needs and individual rights He shows that interdependence is not limited to the mutual linkages within advanced industrial societies but extends both to the relations between advanced and developing nations and to the environmental contexts of human existence *Dramatic Global Population Growth Embraces the Growing Older Population*
Edward A McKinney, 2018-11-16 The world is witnessing a dramatic demographic population growth explosion across all age groups that had its beginning around the early 1800s when the first billion people in population was recorded Most importantly has been an increasing growth in the older population Does population aging matter in the twenty first century Yes it matters because as research has pointed out the increasing older population globally will have a significant impact on all essential societal systems the family pensions and retirement and financial institutions as well as medical health and social systems This growth explosion or phenomenon will affect all continents countries and regions regardless of economic political and military power Causative factors for this global growth in population have come about primarily as a result of medical advances innovations agricultural development and the industrial revolution especially the development of railways seaways and highways A major emphasis of the book focuses on several very important factors the growing older population as aforementioned especially its impact on all of essential societal systems and the subject of ageism Ageism becomes extremely important considering that the growing older population the silver tsunami represents the new majority This new majority will no longer be ignored Gerontologists for years have attempted to call attention to the fact Expectations for old people are based on negative age stereotypes Members of American society generally expect and even encourage the aged to be asexual intellectually rigid unproductive ineffective and disengaged Seniors are supposed to stay out of the way sit in their rocking chairs and enjoy the golden years They are expected to be inactive invisible but happy Levin J and Levin W Ageism Prejudice and Discrimination Against the Elderly California Wadsworth Publishing 1941 pp 97 98 Speaking of being ignored why aren't more members of the older population involved at the decision making tables in shaping a society for all ages After all they would bring years of experiences skills knowledge and values for creating a society for all ages in the twenty first century with justice and human rights for all Currently there is a global movement with a goal of the eradication of ageism in all of its forms Some will recall from several decades ago the Grey Panther Movement in America with a similar mission of the eradication of all injustices at the time being experienced by the older population The current movement says The time is now not later One major social injustice being experienced by the growing old population globally is the lack of income security in old age including the lack of access to other essential services such as medical health and social including long term care More than 50 percent 51 percent of older persons globally do not have basic income security or a social pension in retirement A more alarming statistic is that in Sub Saharan Africa forty seven countries eight two percent 82.5 of retirees do not have a social pension Yes for the older population the new majority the time is now for correcting the aforementioned injustices Maybe what is needed is a human seismic force comprising the new majority to initiate a social

movement with a goal of the eradication of all forms of ageism and ensuring that the growing older population will live in dignity and respect in later life including social protection pensions
