*An Elementary Treatise on Frequency Curves and Their Application (Classic Reprint)* Arne Fisher, 2017-10-11 Excerpt from *An Elementary Treatise on Frequency Curves and Their Application* I wrote therefore to Mr Fisher and inquired whether he intended to publish any further studies on this subject From his reply I learned that he had delivered a series of lectures on this very topic before Professor Glover's insurance classes at the University of Michigan during the month of March 1919 but that the proposed method had been met with such captious opposition in certain actuarial circles that he had decided to abandon the plan Of publishing anything further on the subject and had even destroyed the English notes prepared for the Michigan lectures About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**An Elementary Treatise on Frequency Curves and Their Application** Arne Fisher, 2015-06-11 Excerpt from *An Elementary Treatise on Frequency Curves and Their Application* The fact that actuarial science is fundamentally a branch of biology rather than of mathematics is overlooked far more generally than ought to be the case Most people even those of education and wide culture are inclined to look upon an actuary as a particularly crabbed narrow and intellectually dusty kind of mathematician In reality his subject is one of the liveliest in the whole domain of biology and none surpasses it in its practical interest and importance to mankind Because what the actuary is or at least should be trying always to formulate more and more definitely are the laws which determine the duration of human life Why the actuary in fact is too often intellectually but little more than a sort of glorified computer is really only the result of a defect in the teaching of biology in our colleges and universities It has only lately come to be recognized anywhere that a biologist needed a substantial foundation in mathematics in order successfully to practice a biological profession It is not too rash a prediction to say that presently the time is coming when no important actuarial post

will be held by a mathematician who knows little or no biology The vigor and originality of his biological outlook will be valued as highly as the rigidity of his mathematical substructure now is About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
