

ATTACK AND DEFENSE

The middle game of go often appears chaotic, but there is order in the chaos, as this book plainly reveals. The result of a joint effort by a tournament-winning Japanese professional player and an experienced American go writer, it lays down a few clear principles, then goes through a wealth of applications, examples, problems, and case studies from professional play. The reader emerges with a thorough grasp of how to choose strategy, how to execute dual-purpose attacks, how to defend with contact plays, how to force his opponent into submission or cooperation, how to invade and reduce territorial frameworks, and when to fight a ko. This is knowledge that no player can afford to be without.

Bozulich,1982 Monographic Series Library of Congress, **Elementary Go Series: Attack and defense** , *The 3-3*
Point Modern Opening Strategy Ch'i-hun Cho,1991 Opening theory in go has a long history and has undergone many changes
In the 17th through 19th centuries the first move in the corner was usually played on the 3 4 point or occasionally the 5 3 or
the 5 4 point The star point was almost never played Then in the mid 1930s the New Fuseki became the vogue The star point
became a key feature and emphasis was placed on central influence In present day opening theory the star point still carries
great weight since it occupies the corner in one move has a powerful influence along the sides and permits a much faster
development than the 3 4 point Its weakness lies at the 3 3 point from which the corner territory can easily be destroyed
However more and more openings are being played today which emphasize tight territorial control Here again the 3 3 point
is critical whether played to secure the corner territory with one move or to destroy the opponents corner territory In these
openings many questions arise about joseki in relation to the surrounding positions In other words joseki cannot be confined
to just one corner or just one side the whole board must be taken into account This book analyzes the role of the 3 3 point in
opening strategy and features examples taken from about 100 of Chi Chikun s games The opening is the most enjoyable part
of the game to study It is also the most intuitive part of the game and its concepts are the easiest to grasp Any reader who
knows the rules should make effortless progress by reading this book *The Breakthrough to Shodan* Naoki Miyamoto,1976
THE BREAKTHROUGH TO SHODAN In this unique treatment of low handicap go a 9 dan professional sets out to change
your whole approach to the game Step by step he shows you how to take the initiative how to attack how to handle the
corners and how to keep the game simple all the while relentlessly hammering away at the negative mentality that keeps
players from advancing Absorb what he had to say and the opponents you once feared may soon have to fear you

Takagawa,1988 The Sanren Sei which consists of three stones played in a row on the star points on one side is the most
powerful and dramatic of modern fuseki patterns yet it is the easiest to master He has enjoyed consistent popularity ever
since it was invented because of its emphasis on developing a bold attacking style In this lucid explanation Takagawa
Shukaku helps you grasp its key concepts and shows you how to use it to secure center influence and build large moyos He
gives a comprehensive coverage of Sanren Sei basics then shows it in action in top level professional play Sanren sai strategy
is easy both to understand and to apply The main themes of this opening are clear and compelling and there are relatively
few josekis to memorize yet by the time you finish this book you will understand why it has been the favorite fuseki of so
