groups The confluence of diverse mathematical disciplines has brought forth work of great scope and depth Particularly  
striking is the influence of algebraic geometry and cohomology theory in the modular representation theory and the  
character theory of reductive groups over finite fields and in the general modular representation theory of finite groups The  
continuing developments in block theory and the general character theory of finite groups is noteworthy The expository and  
research aspects of the Summer Institute are well represented by these papers      *Elements of Algebra* George Albert
