Answers these questions What is the Human Potential Movement Is the New Age a religious phenomenon And much more

New Age Religion and Western Culture Wouter J. Hanegraaff,2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement [ITJEMAST 10\(8\) 2019](#) , International Transaction Journal of Engineering

Hot Spots Lynda Gratton,2007-02-19 You always know when you are in a Hot Spot You feel energized and vibrantly alive Your brain is buzzing with ideas and the people around you share your joy and excitement Things you ve always known become clearer adding value becomes more possible Ideas and insights from others miraculously combine with your own to create new thinking and innovation When Hot Spots arise in and between companies they provide energy for exploiting and applying knowledge that is already known and genuinely exploring what was previously unknown Hot Spots are marvelous creators of value for organizations and wonderful life enhancing phenomena for each of us Lynda Gratton has

spent more than ten years investigating Hot Spots discovering how they emerge and how organizations can create environments where they will proliferate and thrive She has studied dozens of companies and talked to hundreds of employees managers and executives in the US Europe and Asia She has asked the important questions Why and when do Hot Spots emerge What is it about certain groups of people that support the emergence of Hot Spots What role do leaders play She s discovered a host of elements that together contribute to the emergence of Hot Spots creating energy and excitement and supporting and channeling that energy into productive outcomes In this groundbreaking book Gratton describes four crucial qualities that an organizational culture must have to support the emergence of Hot Spots looks at what leaders can do to encourage them and offers activities and tools you can use in your own company to increase the probability of them arising In these days when traditional organizational boundaries are becoming barriers to progress Gratton offers advice and guidance that you can use right now to increase the probability of Hot Spots emerging in your organization Inclusive Development of Society Ford Lumban Gaol,Natalia Filimonova,Irina Frolova,Ignatova Vladimirovna,2020-06-02 Inclusive Development of Society contains papers that were originally presented at the 2018 International Congress on Management and Technology in Knowledge Service Tourism Hospitality SERVE 2018 held 6 7 October and 15 16 December 2018 in Kuta Bali Indonesia and 18 19 October 2018 at The Southern Federal University Rostov on don Russia The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences economics and the arts The papers focus especially on such topics as language cultural studies economics behavior studies political sciences media and communication psychology and human development The theoretical research studies included here should provide a solid foundation for the development of new tools that explore the possibilities of developing tourism hospitality service industries in Knowledge Economic Era and the empirical papers will advance our knowledge regarding the impact of information technologies in organizations and institutions practices These proceedings should be of interest to academics and professionals in the wider field of social sciences including disciplines such as education psychology tourism and knowledge management A Guide for the Godless Andrew Kernohan,2008-02 **The Socio-Economic Approach to Management Revisited** Anthony F. Buono,Henri Savall,2015-05-01 This volume is part of the ongoing collaboration between the RMC series and the Socio Economic Institute for Firms and Organizations ISEOR a French intervention research think tank co directed by Henri Savall and V ronique Zardet Building on an earlier collaboration on the ISEOR approach Socio Economic Intervention in Organizations The Intervener Researcher and the SEAM Approach to Organizational Analysis IAP 2007 Buono and Savall bring together over 30 talented intervener researchers to explore and examine the ongoing evolution of the Socio Economic Approach to Management SEAM This volume revisits the application of SEAM in the context of intervention challenges in the wake of the recent economic crisis and the disruptive change that has taken hold across the world The basic foundation of SEAM built on the idea of strategic patience the need to undertake holistic intervention in organizations

and the challenge to get organizational members to listen to themselves through what they refer to as the mirror effect has remained the same In response to economic and organizational pressures in the current environment however there has been a concomitant emphasis on helping client organizations achieve short term results while still maintaining focus on the long term Many ideas that have become part of the current discourse within ISEOR today were not as explicitly addressed in the initial volume from the destructive effect of the Taylorism Fayolism Weberism TFW virus to the need to focus on ways to ensure the sustainability of a SEAM intervention the growing importance of collaborative interactions between external and internal consultants and the growing importance of cocreating knowledge with client firms and organizations **Physical**

Five Elements, Six Conditions Gilles Marin, 2016-04-12 Taoism and the use of the five elemental forces of nature for healing says Gilles Marin are esoteric understandable only through daily experience with a knowledgeable mentor Marin s 25 years of clinical practice teaching the ancient Taoist method of Chi Nei Tsang which uses hands on techniques and Taoist meditations to help clients heal uniquely qualifies him for the task Five Elements Six Conditions shows how simple and practical the ancient Taoist healing principles are and how effectively they deepen all methods of healing including modern medical approaches Step by step he shows how to work with instead of against the body whereby healing becomes not only possible but inevitable His clear language along with color coded maps and diagrams enables readers to understand the alchemical principles formed and refined over hundreds of years Each chapter includes specific exercises and meditations to help anyone integrate the essence of the teaching and develop at the physical mental emotional and spiritual levels

Mission in Contemporary Scotland Liam Jerrold Fraser, 2021-09-30 Mission in Contemporary Scotland is the first book to fully examine the challenges and opportunities of Christian mission in contemporary Scotland It covers all of the most important topics and questions engaging the church today such as the reality of decline the changing nature of domestic mission the response of the Church to change and the different models of mission that are being used today Describing and analysing a wealth of concrete examples from a Scottish context this study gives practical guidance to church leaders engaged in Fresh Expressions and church planting in a Scottish context A major contribution of the book is to envisage ways in which the institutional Church can respond imaginatively to its secular and

pluralist context This is the first work of its kind and fills a significant gap in the market Managing Stress Brian Seaward, 2011-07-22 Managing Stress Seventh Edition provides a comprehensive approach to stress management honoring the integration balance and harmony of mind body spirit and emotions The holistic approach taken by internationally acclaimed lecturer and author Brian Luke Seaward gently guides the reader to greater levels of mental emotional physical and spiritual well being by emphasizing the importance of mind body spirit unity Referred to as the authority on stress management by students and professionals this book gives students the tools needed to identify and manage stress while teaching them how to strive for health and balance **To Stake a Claim** J. Andrew Kirk, Kevin J Vanhoozer, 2021-04-16 An original international collaboration To Stake a Claim researches the relationship between what counted for knowledge in the West how this knowledge has changed over the years and how those changes related to the mission of the church as an evangelizer within Western culture Examining four key areas of study To Stake a Claim evaluates the dominant positions in contemporary philosophy regarding truth rationality and pluralism It first analyzes consequences for humanity that holding these positions implies Next it looks at faith religion and revelation in the context of the dominant positions of contemporary philosophy discussed in the first part The third part explores the dominant positions of contemporary theology Finally it summarizes the epistemological problems involved in the process of communicating the gospel within Western culture and evaluates the theological and missiological views of this communication *Towards Success in a Competitive Market: The Importance of Entrepreneurship and Innovation* Marcin Gebarowski, Renata Lisowska, 2019 The nine papers published in this issue of the Journal of Entrepreneurship Management and Innovation point to various problems which are important for effective management in a turbulent and dynamically changing contemporary market The authors of the articles come from universities in the Czech Republic Italy the Republic of Moldova Nigeria Poland Taiwan and Ukraine The scientists present current and original views on issues related to research the role of innovative entrepreneurship in economic development the competitiveness of small innovative companies social networking in family businesses the connections between socioemotional wealth and competitive advantage of family firms agrirural entrepreneurial alertness the assessment of human resources interactions the impact of seasonality on employment in tourism and socio economic clients requirements for food packaging However regardless of the subject matter all the papers indicate an organizational framework and solutions for achieving success in a competitive market The first article by Radka MacGregor Pelik nov addresses R D expenditure and innovations in the EU which are the foundations for competitiveness in contemporary economies The author focuses on the following three essential questions How much is spent on R D How many patentable inventions are filed and succeed and how many other ideas lead to innovations Is it possible to imply a potential relationship and what are the trends The described study entailed secondary data while exploring hard data sources such as Eurostat and the European Patent Office databases official or legislative documents such as Europe 2020 and the academic literature Furthermore the author

used direct observations field search and her own experience gained over 20 years by participating in many patent applications and other instruments protecting future innovations Answering the questions it was found that the 3% threshold will not be met in the larger part of the EU the number of patent applications and granted patents keep growing along with digitalization and the possibility of a relationship between these factors and trends exists but is not conclusive or dramatically strong The research challenge taken by Radka MacGregor Pelik nov requires an appreciation that as she notes one of the limitations of the study was caused by the intangible ephemeral and hardly predictable nature of innovations and the impossibility to collect and mathematically process all the involved phenomena The second paper written by Rodica Crudu refers to the importance of entrepreneurship in driving innovation economic growth and welfare as well as job creation and draws attention to the fact that innovation is seen as a driving force in the economic development of nations Since innovative entrepreneurship has begun to be considered a key factor in modern economic development finding a prominent place at the core of the European Union s development strategy Europe 2020 the author aims to analyse the role of innovative entrepreneurship in the economic development of EU member states by testing a model that captures new or young innovative firms as manifestations of innovative entrepreneurship along with determinants of economic growth rates The key findings of the paper show that innovative entrepreneurs are more often present in countries with higher development levels and higher incomes being motivated by the improvement opportunity they see in becoming entrepreneurs However a higher degree of entrepreneurship especially in the creation of new firms does not substantially contribute to accelerated economic development This is explained by the variation in the motivation necessity or improvement oriented of entrepreneurs across EU countries In developed countries entrepreneurs are most likely to be of Schumpeterian type while in developing countries most of them are shopkeepers The presented paper has significant practical implications for decision and policy making authorities in terms of the possible directions of innovative entrepreneurship policy development including friendlier and more efficient policies aimed at the creation of new firms and the development of SME supporting tools Edward Stawasz whose paper is based on the results of conducted research carried out an analysis and evaluation of the importance of selected determinants of competitiveness of small innovative enterprises operating in international markets and using business advice services The first part of this article is a comprehensive literature review concerning the identification of determinants of competitiveness of small enterprises and the characteristics of motives for using as well as the areas and effects of using business advice The second part of the article presents an analysis of the results of a survey conducted among 67 small innovative enterprises operating in international markets and at the same time using business advice services carried out with the use of the CATI method The conducted analysis has shown that the use of business advice extends the scope of determinants of competitiveness of enterprises operating in international markets Business advice can be considered an effective factor in improving the competitiveness of enterprises already characterized by high

competitiveness which means that a high level of competitiveness favors the effectiveness of the use of business advice. An important conclusion reached by the author is the existence of a positive relationship between business advice and enterprises' capacity to absorb business knowledge. Therefore, improving the competitiveness of enterprises requires using business advice and improving the business knowledge absorptive capacity. The focus of the next article, written by Kenneth Chukwujioke Agbim, is the conceptual considerations regarding social networking and family businesses presented in a review of the contribution of social networking to the financial and non-financial performance of family businesses. Based on an analysis of 55 peer-reviewed published journal articles, the author identified the most frequently used social networking platforms, the measures of financial performance, the measures and proxies of non-financial performance, and the differences between the financial and non-financial performance. The study proposes the use of both financial and non-financial measures in assessing the performance of family businesses due to their complementary roles. Therefore, the presented research contributes to the family business literature by highlighting the importance of combining financial and non-financial measures in assessing family business performance, indicating that due to the specificity of a family business, its performance should be assessed in such a joint manner. The research topic of the fifth article, by Katarzyna Bratnicka, Myliwiec, and Martyna Wronka, is socioemotional wealth in the context of competitive advantages of family businesses. These authors argue that socioemotional wealth may trigger or limit family firms' strategic initiatives that ultimately shape their competitive advantage. The basic assumption is that unlike non-family firms, family businesses have some unique qualities that should be considered. The research was conducted in almost two hundred firms through a telephone survey. The obtained results reveal that indeed socioemotional wealth and competitive advantage are partially associated, and socioemotional wealth can be regarded as an important strategic antecedent to firm performance. Therefore, the first main theoretical implication is the emphasis on the importance of socioemotional wealth as a strategic resource. The second main conclusion is the recommendation that socioemotional wealth is a relevant determinant of competitive advantage. Family businesses rely on more complex social dynamics than the dynamics of a pure market, where the informal sphere is critical for current functioning. Moreover, the connections between family business attributes and firm performance are by no means easy to understand. Consequently, this paper makes a significant contribution to the scientific literature. In the next article, Chaoyun Liang, presents research on agrirural entrepreneurship and the results of a series of three studies conducted to develop a measure of entrepreneurial alertness in the agrirural environment, which is empirically valid, easy to use, and can analyze how the personality traits of agrirural entrepreneurs affect their entrepreneurial alertness. The results indicate that both extraversion and openness affect all of the dimensions of entrepreneurial alertness, whereas conscientiousness only influences scanning and searching, and agreeableness has an impact solely on evaluation and judgment. The presented findings also demonstrate the interactive relationships between extraversion and openness for all of the dimensions of

entrepreneurial alertness The research provides a new understanding of how agrirural entrepreneurial alertness can be assessed more practically and how personality traits can help predict various dimensions of agrirural entrepreneurial alertness The author states that due to the fact that agriculture remains the basis of socioeconomic development governments worldwide are actively formulating relevant policies to aid in the restructuring and upscaling of their agricultural industries Thus providing essential guidance in agricultural entrepreneurship for diversifying rural regions should be their central concern Therefore recognizing and interpreting opportunities are the most crucial abilities that should be fostered in developing agrirural entrepreneurship The seventh paper is devoted to the subject of human resources in particular interactions The author of this text is Anna Pereverzieva who indicates that there is a need to develop a methodological approach to the assessment of united communities human resources level of interactions Hence in light of the gap in the scientific literature she tries to determine such an approach The author s work is based on the example of a united community and a structural unit and in addition considers two determinants of human resources interactions the group size and the nature of labor As a tool of the empirical study the author used expert assessment and the application of certain mathematical dependencies that allowed the coefficient of interactions to be determined It transpired that small groups with intellectual labor have higher levels of interactions than large groups with a predominance of manual labor It is worth noting that the proposition of a methodical approach is universal and might be used by both communities and business entities Moreover an additional advantage of the study is the proposal of a 4 stage procedure for assessing the level of human resources interactions The eighth paper written by Aleksandra Grobelna and Katarzyna Skrzyszewska connects tourism seasonality with employment in the travel and tourism sector The issue raised by these authors is a current and important topic since nowadays seasonality plays a decisive role in creating demand in the tourist industry The problem is investigated from the perspective of tourism and hospitality students of higher educational institutions located in the northern part of Poland Southern Baltic Sea Region The main point of the authors interest was the students attitudes towards seasonality in tourism employment and its impact on students tourism employment aspirations As a research method a direct questionnaire was used and the obtained data were analyzed statistically According to one of the conclusions more students agree that seasonality contributes positively rather than negatively to tourism employment The authors indicate that the depicted results of the research study can be of substantial importance to managers in the industry which suffers from low employment status and experiences chronic shortages of skilled and well qualified employees The last article by Agnieszka Cholewa W jcik Agnieszka Kawecka Carlo Ingraio and Valentina Siracusa presents interesting results of research on the requirements for packaging to answer contemporary consumers needs The study represents a holistic approach to the topic The authors conducted a survey among clients of shopping malls in the Ma opolska region of Poland Analysis of the obtained data indicated the following order of priority of consumers needs ensuring safety meeting legal regulations wants related to

lifestyle improving consumers life quality through added value and protection of the environment Furthermore the team of authors proposed the model packaging According to them modern food packaging should be characterized by health safety simplicity reduction convenience identity belonging aesthetics design and meaning sustainability intelligence These conclusions have a managerial dimension because they might be valuable premises for developing packaging and introducing innovative solutions in this area The paper confirms that both the design of food packaging systems and the production of such kinds of packaging should be developed after giving due consideration not only to the technical requirements but also to the socio economic and the environmental ones As the editors of this issue we would like to thank all the authors for their contribution and for sharing their own theoretical considerations and the results of empirical research We are convinced that the presented studies constitute a valuable contribution to management sciences in the area of effective organizational management in a turbulent environment We would also like to thank the reviewers for their efforts in reviewing the articles for this issue as well as their valuable comments and suggestions that have influenced its final shape We hope that the articles presented in this issue will interest readers scientists and researchers from around the world in addition to inspiring them to conduct further research on the topics discussed
