Society & Culture , *On Social Organization and Social Control* Morris Janowitz, 1991-05-28 In the four decades following the end of World War II Morris Janowitz 1919-88 published major works in macrosociology urban and political sociology race and ethnic relations and the study of armed forces and society His research was deeply rooted in the traditions of philosophical pragmatism and the Chicago school of sociology influences which led him to reject grand theories and mechanistic explanations of social life Yet he remained confident in the capacity of sociological reason to come to grips with central aspects of the human condition On the basis of his studies Janowitz came to believe that the transition from early to advanced industrial society radically altered institutional organization to make democratic social control more difficult though not impossible to achieve The task of his pragmatic sociology was to identify fundamental trends in the social organization of industrial societies to indicate their substantive implications for social control and to clarify realistic alternatives for institution building which would strengthen the prospects for maintaining liberal democratic regimes In this volume James Burk selects from Janowitz's scholarly writings to provide a comprehensive overview of his wide ranging interests Organized to demonstrate the common logic of inquiry and substantive unity of Janowitz's contribution to several subfields of sociology the collection includes analyses of the concept of social control ethnic intolerance and hostility citizenship in Western societies models for urban education and the professionalization of military elites Burk provides a richly detailed critical account of Janowitz's intellectual development placing his writings in historical context and showing their continuing relevance for sociological research Useful to both students and specialists the volume is an important source for the ideas and methods of one of sociology's leading figures **Elements of Social Organization** Raymond Firth, 1969

Essays on Social Organisation and Values Raymond Firth, 2021-03-24 In this volume Professor Firth has brought together

and commented upon a number of his papers on anthropological subjects published over the last thirty years All these essays relate in different ways to his continuing interest in the study of social process especially in the significance within a social context of individual choice and decision Although some specialist studies are included e g the group of papers dealing with the Polynesian island of Tikopia the main themes of the book are broad ones and there are important general essays on such topics as social change social structure and organization modern society in relation to scientific and technological progress and the study of values mysticism and religion by anthropologists There is also a hitherto unpublished chapter on anthropology as a developing science **The Social Organization of Arts** Volker Kirchberg,Tasos Zembylas,2024-11-22 In recent decades social and economic changes have brought about a growing awareness of the role of art and culture in society As a result scholars have turned their attention to a sociological view of arts developing hermeneutic approaches and conducting empirical research that have led to a wealth of insights into the organization of arts These studies of the creation production distribution evaluation and consumption of arts are clearly sociological but they include approaches from other disciplines notably arts management studies and cultural policy research Volker Kirchberg and Tasos Zembylas critically discuss seven major theories of the social organization of arts in Western societies with the aim of encouraging further research and theoretical developments Social Organisation in an Indian Slum Ratna N. Human Thought and Social Organization
Murray J. Leaf, Dwight Read, 2012-06-07 Human beings have two outstanding characteristics compared to all other species the apparently enormous elaboration of our thought through language and symbolism and the elaboration of our forms of social organization The view taken in Human Thought and Social Organization Anthropology on a New Plane is that these are intimately interconnected To understand this connection the book compares the structure of the systems of thought that organizations are built upon with the organizational basis of human thinking as such An experimental method is used leading to a new science of the structure of human social organizations in two senses First it gives rise to a new kind of ethnology that has the combination of empirical solidity and formal analytical rigor associated with the paradigmatic sciences Second it makes evident that social organizations have distinctive properties and require distinctive explanations of a sort that cannot be reduced to the explanations drawn from or grounded in these other sciences Human social organizations are created by people using systems of ideas with very specific logical properties This book describes what these idea systems are with an unbroken chain of analysis that begins with field elicitation and continues by working out their most fundamental logico mathematical generative elements This enables us to see precisely how these idea systems are used to generate organizations that give pattern to ongoing behavior The book shows how organizations are objectified by community members through symbolic representations that provide them with shared conceptions of organizations roles or relations that they see each other as participating in The case for this constructive process being pan Homo sapiens is described spanning all human communities from the Upper Paleolithic to today and from the most seemingly primitive Australian tribes to modern day America and India While focusing primarily on kinship Human Thought and Social Organization shows how the analysis applies with equal precision to other social areas ranging from farming to political factionalism

Social Organization and Peasant Societies Maurice Freedman, 2017-07-05 The essays included in Social Organization and Peasant Societies were written in honor of the man who taught their authors Each entry is about different problems within the general field of social organization They were composed in many styles and deal ethnographically with a heterogeneous collection of peoples and countries Together they illustrate an important aspect of Firth's influence as a teacher the range of his interests and his success in promoting social anthropological research on the broadest front The breadth and the variety in the work of his students reflect Firth's own catholicity From economics he reached into every corner of the field covered

by social anthropology and many of his interests can be traced in these essays on themes in kinship and marriage by Baric Benedict Kaberry and Leach and on religious subjects by Freedman Morris and Stanner Still more detail the study of modern social change by Little and Mayer There is even one is on art by Forge Three are devoted to subjects in economic anthropology by Belshaw Swift and Ward On all of these varied and complex topics Raymond Firth has written extensively and taught untiringly Many of the contributors to his festschrift are themselves leading anthropologists Raymond Firth s importance in the history of social anthropology is undisputed He came into the profession when it was small and unformed when it existed only in the tiny groups of people around Malinowski and Radcliffe Brown He urged it on by intellectual leadership by careful organization and by devoted service He was one of a small band of scholars he created a large school He inherited an esoteric seminar from Malinowski he turned it into a great class where over the years hundreds of students marveled at his skill and learned their craft as analysts and field workers His protege listened to his formulation of problems his critique of methods and his courteous but un *Elements of Social Organization* Raymond William Firth,2003-01-01
