- **Efficiency**--the ability of insurance to act as the lowest-cost method for achieving goals remains an open question
- **Equity**--A government can structure the program to target those most deserving
 - The often indirect method by which governments provide subsidies through insurance is inconsistent with efforts to target benefits to the deserving as traditionally defined.
 - Such is the case with the farmer that plants high risk crops.
- **Legitimacy**--Government insurance programs are typically rare in the U.S. and abroad, although the scope of the few programs that exist is large. The fact that the insured pay premiums help clarify legitimacy (vs. grant programs)

Efficiency, Equity, and Legitimacy Roger B. China's Quest for Political Legitimacy Baogang Guo, 2010-09-23 This book examines the new equity enhancing politics in China in the context of Chinese traditional cognitive patterns of political legitimacy and its implication for Chinese political development in the near future Based on an analysis of the new governing philosophy the generation of political elite and a new set of public policies the book reaffirms the emergence of a new Chinese polity that infuses one party rule with limited electoral and deliberative democracies Unlike many scholars who perceive the contemporary Chinese history as a constant search for democracy this book takes a very different approach It asserts that the enduring question in political development in China today is no different from what was sought after throughout Chinese history namely the constant search for political legitimacy Even though the quest for democracy is instrumental to that end it may not ultimately lead to the embrace of a full fledged liberal democracy The new politics is not only a rationalization of the efficiency based development but also a major paradigm shift in China's developmental strategy
