A photograph of a mural depicting a scene with several figures, possibly a religious or historical event, set against a textured background. The mural is painted on a wall and shows a group of people in traditional or historical attire. The figures are rendered in a somewhat stylized manner, with some wearing white robes and others in more colorful clothing. The background of the mural is a mix of green and brown tones, suggesting a landscape or architectural setting. The overall style of the mural is reminiscent of traditional Indian art, possibly from the Vijayanagara period.

Roby - *COPIED AND REPRODUCED* Vol. 1: *Words & Pictures of America* 1997

Abstract The purpose of this study was to determine the effect of a 12-week, 100% body weight (BW) resistance training program on the muscle strength and body composition of sedentary, middle-aged women. The subjects were randomly assigned to either a resistance training (RT) or control (CON) group. The RT group performed a 12-week, 100% BW resistance training program, while the CON group performed no exercise. The RT group showed significant increases in muscle strength and body composition, while the CON group showed no significant changes. The results of this study suggest that a 12-week, 100% BW resistance training program is effective in improving muscle strength and body composition in sedentary, middle-aged women.
