Newly-Built Environment A Study of the Nubian Experience in Egypt Wael Salah Fahmi, 2014-04-01 Generally construction of dams is regarded as means of economic progress in many countries Major consequences of such projects are the inundation of upstream areas and the resettlement of entire communities in newly built environments where they experience dramatic transformation in their lifestyles The present study takes the Nubian resettlement experience after the creation of Lake Nasser that submerged their old settlements along the river Nile Following their resettlement the design of the newly built environment disrupted the Nubian traditional lifestyles and patterns of privacy mechanisms territoriality and social interaction The inadequacy of the newly built environment was mainly attributed to the Nubians transfer from spacious homes in the old villages to compact contiguous houses in the new settlements The arrangement of these resettlement state built houses distributed on the basis of household size has further resulted in the fragmentation and the dispersion of traditional kinship based neighborhoods Within an interdisciplinary approach the study is based on theoretical historical and conceptual themes and on empirical research It sets out to examine the households responses towards and adaptation mechanisms with the newly built environment looking critically at the achievements of imposed top down planning in meeting the socio cultural and economic needs of those resettled *Historical Dictionary of Egypt* Arthur Goldschmidt, Jr., 2023-07-25

Egypt is the world's oldest continuous country with a recorded past of over 6 000 years Often invaded conquered and occupied by foreign armies Egypt has never lost its identity The Egyptians of today although they have changed their language once and their religion twice descend mainly from the Egyptians who built the Giza Pyramids and the Temple of Karnak who served Alexander the Great and his heirs who submitted to Augustus Caesar and raised much of the grain that fed the Roman Empire who started Christian monasticism and the veneration of the Virgin Mary and who advanced and sustained Muslim learning in what is now the world's oldest functioning university It was and is one of the most important countries in the world Historical Dictionary of Egypt Fifth Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Egypt *Resettling Displaced Communities* William L.

Africa Stephan F. Miescher, 2022-07-12 Since its construction in the early 1960s the hydroelectric Akosombo Dam across the Volta River has exemplified the possibilities and challenges of development in Ghana. Drawing upon a wealth of sources *A Dam for Africa* investigates contrasting stories about how this dam has transformed a West African nation while providing a model for other African countries. The massive Akosombo Dam is the keystone of the Volta River Project that includes a large manmade lake 250 miles long the VALCO aluminum smelter new cities and towns a deep sea harbor and an electrical grid. On the local level Akosombo has meant access to electricity for people in urban and industrial areas across southern Ghana. For others Akosombo inflicted tremendous social and environmental costs. The dam altered the ecology of the Lower Volta displaced 80 000 people in the Volta Basin and affected the livelihoods of hundreds of thousands of Ghanaians. In *A Dam for Africa* Stephan Miescher explores four intersecting narratives Ghanaian debates and aspirations about modernization in the context of decolonization and Cold War international efforts of the US aluminum industry to benefit from Akosombo through cheap electricity for their VALCO smelter local stories of upheaval and devastation in resettlement towns and a nation wide quest toward electrification and energy justice during times of economic crises droughts and climate change. *The*

Allegany Senecas and Kinzua Dam Joy A. Bilharz, 2002-01-01 In the late 1950s the U S Army Corps of Engineers announced its intention to construct a dam along the Allegheny River in Warren Pennsylvania. The building of the Kinzua Dam was highly controversial because it flooded one third of the Allegany Reservation of the Seneca Nation of Indians. Nearly six hundred Senecas were forced to abandon their homes and relocate despite a 1794 treaty that had guaranteed them those lands in perpetuity. In this revealing study Joy A. Bilharz examines the short and long term consequences of the relocation of the Senecas. Granted unparalleled access to members of the Seneca Nation and reservation records Bilharz traces the psychological economic cultural and social effects over two generations. The loss of homes and tribal lands was heart wrenching and initially threatened to undermine the foundations of social life and subsistence economy for the Senecas. Over time however many Senecas have managed to adapt successfully to relocation creating new social networks invigorating their educational system and becoming more politically involved on local tribal and national levels. **Resettling Displaced**
