From Neurons to Neighborhoods National Research Council, Division of Behavioral and Social Sciences and Education, Institute of Medicine, Board on Children, Youth, and Families, 2012-08-29 *From Neurons to Neighborhoods* An Update Workshop Summary is based on the original study *From Neurons to Neighborhoods* Early Childhood Development which released in October of 2000 From the time of the original publication's release much has occurred to cause a fundamental reexamination of the nation's response to the needs of young children and families drawing upon a wealth of scientific knowledge that has emerged in recent decades The study shaped policy agendas and intervention

efforts at national state and local levels It captured a gratifying level of attention in the United States and around the world and has helped to foster a highly dynamic and increasingly visible science of early childhood development It contributed to a growing public understanding of the foundational importance of the early childhood years and has stimulated a global conversation about the unmet needs of millions of young children Ten years later the Board on Children Youth and Families of the Institute of Medicine IOM and the National Research Council NRC held a 2 day workshop in Washington D C to review and commemorate a decade of advances related to the mission of the report The workshop began with a series of highly interactive breakout sessions in which experts in early childhood development examined the four organizing themes of the original report and identified both measurable progress and remaining challenges The second day of the workshop speakers chosen for their diverse perspectives on early childhood research and policy issues discussed how to build on the accomplishments of the past decade and to launch the next era in early childhood science policy and practice From Neurons to Neighborhoods An Update Workshop Summary emphasizes that there is a single integrated science of early childhood development despite the extent to which it is carved up and divided among a diversity of professional disciplines policy sectors and service delivery systems While much work still remains to be done to reach this goal the 2010 workshop demonstrated both the promise of this integrated science and the rich diversity of contributions to that science

The Oxford Handbook of Children's Rights Law Jonathan Todres,Shani M. King,2020-02-19 Children s rights law is a relatively young but rapidly developing discipline The U N Convention on the Rights of the Child the field s core legal instrument is the most widely ratified human rights treaty in history Yet like children themselves children s rights are often relegated to the margins in mainstream legal political and other discourses despite their application to approximately one third of the world s population and every human being s first stages of life Now thirty years old the Convention on the Rights of the Child CRC signalled a definitive shift in the way that children are viewed and understood from passive objects subsumed within the family to full human beings with a distinct set of rights Although the CRC and other children s rights law have spurred positive changes in law policies and attitudes toward children in numerous countries implementation remains a work in progress We have reached a state in the evolution of children s rights in which we need more critical evaluation and assessment of the CRC and the large body of children s rights law and policy that this treaty has inspired We have moved from conceptualizing and adopting legislation to focusing on implementation and making the content of children s rights meaningful in the lives of all children This book provides a critical evaluation and assessment of children s rights law including the CRC With contributions from leading scholars and practitioners from around the world it aims to elucidate the content of children s rights law explore the complexities of implementation and identify critical challenges and opportunities for children s rights law

Targeting Investments in Children Phillip B. Levine,David J. Zimmerman,2010-10-15 A substantial number of American children experience poverty about 17 percent of those under the age of eighteen meet the government s definition and the proportion is even greater within minority groups Childhood poverty can have lifelong effects resulting in poor educational labor market and physical and mental health outcomes for adults These problems have long been recognized and there are numerous programs designed to alleviate or even eliminate poverty as these programs compete for scarce resources it is important to develop a clear view of their impact as tools for poverty alleviation Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric their impact on earnings in adulthood The volume s contributors explore a variety of issues such as the effect of interventions targeted at children of different ages and study a range of programs including child care after school care and drug prevention The results will be invaluable to educational leaders and researchers as well as policy makers
