Stephen M. Shore

From Ritual To Repertoire A Cognitive Developmental Systems Approach With Behavior Disordered Children:

From Ritual to Repertoire Arnold Miller, Eileen Eller-Miller, 1989-08-22 Using a systems approach firmly grounded in cognitive development theory and findings this book offers a new well researched method for intervening with severely disturbed children autistic brain damaged retarded emotionally deprived and developmentally delayed This approach emphasizes building on the strengths of each child's coping mechanisms rather than on conventional behavior modification techniques which the authors see as raising serious ethical questions Their approach has been tried and tested in clinical practice and has demonstrated its efficacy The book examines the formation of systems in normal and abnormal development and discusses specifics of assessment and intervention with disordered children Heinz Werner and Developmental Science Jaan Valsiner, 2006-11-22 Heinz Werner 1890-1964 was one of the three key developmental psychologists of the 20th century along with Jean Piaget and Lev Vygotsky This book is a new exploration of Werner's ideas and their social contexts in Vienna in his student years in Hamburg up to 1933 followed by the years of transit as an immigrant to America at times of economic depression finally culminating in his establishment of the prominent Clark tradition in American psychology in the 1950s The book offers an in depth analysis of Werner's ideas as they were originally formulated in Vienna and Hamburg and how they were changed by North American influences Werner's pivotal role between European and American intellectual traditions is illuminated through the use of rich memories of his former students unique documents from Werner's personal library at Clark and analyses of links with other European traditions in philosophy and biological sciences The European period prior to 1933 in Werner's academic life is found to be definitive for Werner's contributions to science The ideas developed in his early career continued in the form of a productive empirical research program in the 1950s at Clark An analysis of the social intellectual climate of the development of psychology in America in the 1950s is a special feature of this book that will further enhance an understanding of Werner's unique contribution This book will be of interest to developmental psychologists sociologists and historians of science philosophers practitioners working in special education and neuropsychology and for general readers interested in the history of ideas and life courses of scientists *The Miller Method (R)* Arnold Miller, 2007-01-15 This practical guide to the Miller Method presents an entirely new perspective on advancing the body organization social and communicative skills of children diagnosed with autism spectrum disorders It covers issues such as communication skills and social play as well as behavioral issues including tantrums aggression and toilet training Autism Spectrum Disorders Megan Moore Duncan, Jeanne Holverstott, Brenda Smith Myles, Terri Cooper Swanson, 2007-09-30 With the increased number of children being diagnosed with Autism Spectrum Disorders parents and professionals are in search of materials that provide information that will enable them to better understand affected children While in the past individuals who were diagnosed had limited verbal and intellectual skills newly diagnosed children often have good language skills and even areas of giftedness This A to Z work contains original entries on the topic of Autism

Ethics, Disability and Sports Ejgil Jespersen, Mike J.

McNamee, 2013-10-18 This volume addresses a range of philosophical and ethical issues in adapted physical activity and disability sports participation more broadly. It is comprised of a range of essays by international scholars whose backgrounds embrace different traditions of philosophy, pedagogy and adapted physical activity. The principal aim of the symposium was to open up and critically explore a range of conceptual and ethical issues and perspectives that have arisen with respect to the engagement of persons with disabilities in a range of physical activity contexts including but not exclusively located in mainstream sporting activities. This book was published as a special issue in *Sport Ethics and Philosophy*.
