From Shrinking To Lean City:

Shrinking Cities Harry W. Richardson, Chang Woon Nam, 2014-03-14 This book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities Much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards The contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective The book comprises four parts world or regional issues with reference to the European Union and Latin America national case studies the United States India China Korea Taiwan Germany Romania and Estonia city case studies Detroit Buffalo Cleveland Naples Belfast and Halle and broad issues such as the environmental consequences of shrinking cities This book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy

Handbook on Shrinking Cities Pallagst, Karina, Bontje, Marco, Cunningham Sabot, Emmanuèle, Fleschurz, René, 2022-10-18 Compelling and engaging this Handbook on Shrinking Cities addresses the fundamentals of shrinkage exploring its causal factors the ways in which planning strategies and policies are steered and innovative solutions for revitalising shrinking cities Chapters cover topics of governance greening and right sizing and regrowth laying the relevant groundwork for the Handbook's proposals for dealing with shrinkage in the age of COVID 19 and beyond

Shrinking Cities in Reunified East Germany Agim Kërçuku, 2022-10-03 The book explores the relationship between the shrinking process and architecture and urban design practices Starting from a journey in former East Germany six different scenes are explored in which plans projects and policies have dealt with shrinkage since the 1990s The book is a sequence of scenes that reveals the main characteristics dynamics narratives reasons and ambiguities of the shrinking cities transformations in the face of a long transition The first scene concerns the demolition and transformation of social mass housing in Leinefelde Worbis The second scene deals with the temporary appropriation of abandoned buildings in Halle Neustadt The third scene observed in Leipzig shows the results of green space projects in urban voids The scene of the fourth situation observes the extraordinary efforts to renaturise a mining territory in the Lausitz region The fifth scene takes us to Hoyerswerda where emigration and ageing process required a reduction and demolition in housing stock and social infrastructures The border city of Grlitz the sixth and last scene deals with the repopulation policies that aim to attract retirees from the West

Governance and Leadership in Shrinking Cities Stanisław Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the

reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects

Quietly Shrinking Cities Maxwell Hartt, 2021-04-01 At 5 percent Canada's population growth was the highest of all G7 countries when the most recent census was taken But only a handful of large cities drove that growth attracting human and monetary capital from across the country and leaving myriad social economic and environmental challenges behind Quietly Shrinking Cities investigates a trend that has been largely overlooked over 20 percent of Canadian cities shrank between 2011 and 2016 and twice that proportion grew more slowly than the national average Yet continuous ubiquitous growth is considered normal and policy and planning professionals have had little success in managing the practical challenges associated with population loss Declining birth rates and an aging population only compound the phenomenon This meticulous work demonstrates that shrinking cities need to rethink their planning and development strategies in response to a new demographic reality questioning whether population loss and prosperity are indeed mutually exclusive

Shrinking Cities Karina Pallagst, Thorsten Wiechmann, Cristina Martinez-Fernandez, 2013-08-15 The shrinking city phenomenon is a multidimensional process that affects cities parts of cities or metropolitan areas around the world that have experienced dramatic decline in their economic and social bases Shrinkage is not a new phenomenon in the study of cities However shrinking cities lack the precision of systemic analysis where other factors now at work are analyzed the new economy globalization aging population a new population transition and other factors related to the search for quality of life or a safer environment This volume places shrinking cities in a global perspective setting the context for in depth case studies of cities within Mexico Brazil Indonesia Germany France Great Britain South Korea Australia and the USA which consider specific economic social environmental cultural and land use

issues *Smaller Cities in a Shrinking World* Alan Mallach,2023-06-13 Over the past hundred years the global motto has been more more more in terms of growth of population of the built environment of human and financial capital and of all manner of worldly goods This was the reality as the world population boomed during the 1960s and 1970s But reality is changing in front of our eyes Growth is already slowing down and according to the most sophisticated demographers the earth's population will begin to decline not hundreds of years from now but within the lifetimes of many of the people now living on the planet In *Smaller Cities in a Shrinking World* urban policy expert Alan Mallach seeks to understand how declining population and economic growth coupled with the other forces that will influence their fates particularly climate change will affect the world's cities over the coming decades What will it mean to have a world full of shrinking cities Does it mean that they are doomed to decline in more ways than simply population numbers or can we uncouple population decline from economic decay abandoned buildings and impoverishment Mallach has spent much of the last thirty or more years working in looking at thinking and writing about shrinking cities from Trenton New Jersey where he was director of housing and economic development to other American cities like Detroit Flint and St Louis and from there to cities in Japan and Central and Eastern Europe He has woven together his experience research and analysis in this fascinating realistic yet hopeful look at how smaller shrinking cities can thrive despite the daunting challenges they face **Neo-liberalism and the Architecture of the Post Professional Era**
