Everyone Teaches and Everyone Learns Lourdes Z. Mitchel, 2013-09-19 The literature on preparing and sustaining quality teachers has suggested that to be successful teacher preparation and development require a mutual collaboration and a synergy of effort among partners most typically a school district and a university teacher preparation program One response has been to draw universities and school districts together in true partnership through Professional Development Schools PDSs Together the partners are responsible for creating environments in schools and in university classrooms that can transform into clinical sites dedicated to best practices and professional growth for all This book is designed to offer practical applications on how partners can work together to implement the mission and goals of the PDS by providing ways that PDS partners can engage in a much deeper and more profound experience that results in a synergistic relationship Joint involvement in application of practice takes each partner to a level far greater than traditional teacher education and professional development practices while creating a cooperative community of practice centered on teacher and student learning

Educational Justice Howard Ryan, 2017-01-01 That education should instill and nurture democracy is an American truism Yet organizations such as the Business Roundtable together with conservative philanthropists such as Bill Gates and Walmart s owners the Waltons have been turning public schools into corporate mills Their top down programs such as Common Core State Standards track judge and homogenize the minds of millions of American students from kindergarten through high school But corporate funders would not be able to implement this educational control without the de facto partnership of government at all levels channeling public moneys into privatization initiatives school closings and high stakes testing that discourages independent thinking Educational Justice offers hope that there s still time to take on corporatized schools and achieve democratic justice in the classroom Forcefully

written by educator and journalist Howard Ryan with contributing authors the book opens with four chapters that discuss theories on teacher unionism social justice pedagogy and corporate school reform These chapters are balanced with four case study chapters documenting exemplary teaching and school site organizing practices in the field Reports from various educational fronts include innovative union strategies against charter school expansion as well as teaching visions drawn from the vibrant whole language movement Bold informative clearly reasoned this book is an education in itself a democratic one at that

Young Children , 2001

Tensions and Triumphs in the Early Years of Teaching Susi Long, 2006 The results of a seven year research study identify the challenges new teachers face and how all concerned can help keep new teachers in the profession Like thousands before them the seven teacher authors of this book started their first teaching jobs full of energy and excitement They were eager to implement the thoughtful practices and ideas they learned in their methods courses in order to make a lasting difference in their students lives and to make a positive change in the profession Then reality hit After a few weeks in the classroom some of the teachers found that their excitement and confidence were replaced by self doubt isolation and disappointment Instead of challenging the status quo in their school systems some of the teachers found themselves slipping toward it as they tried to bring their teaching visions to life In a climate where nearly half of new teachers leave the profession in the first five years many early career teachers are facing the same disillusionment and challenges That s why these seven teachers got together

with a university researcher to study what life is really like for new teachers The authors recount their experiences from the preservice year through the first six years of teaching They share moments of joy and success but they also tell hard stories about obstacles that drive the knowledge enthusiasm and energy of new teachers underground and cause many to leave the profession Their stories will resonate with both new and experienced teachers offer important advice for job seekers and provide much needed insights for university faculty school administrators colleagues of new teachers and district leaders to think about how they can better embrace the energy and innovation that new teachers bring while supporting them in moments of insecurity and vulnerability New teachers will know they are not alone and that even when they feel the least empowered they actually do have a voice and can use it to effect change
