Brooks,Denice Heller Wardrop,2013-01-25 The lands and waters of the Mid Atlantic Region MAR have changed significantly since before the 16th century when the Susquehannock lived in the area Much has changed since Captain John Smith penetrated the estuaries and rivers during the early 17th century since the surveying of the Mason Dixon Line to settle border disputes among Maryland Pennsylvania and Delaware during the middle of the 18th century and since J Thomas Scharf described the physiographic setting of Baltimore County in the late 19th century As early as 1881 Scharf provides us with an assessment of the condition of the aquatic ecosystems of the region albeit in narrative form and already changes are taking place the conversion of forests to fields the founding of towns and cities and the depletion of natural resources We have always conducted our work with the premise that man is part of and not apart from this ecosystem and landscape This premise and the historical changes in our landscape provide the foundation for our overarching research question how do human activities impact the functioning of aquatic ecosystems and the ecosystem services that they provide and how can we optimize this relationship

Cunningham,Nathan H. Nazdrowicz,2018-11-26 The definitive resource for finding identifying and conserving Maryland s amphibians and reptiles Naturalists herpetologists and ecologists alike agree that tracking herpetofauna is a challenging undertaking Scientists are concerned about the decline of once familiar species but evidence has often been too anecdotal to support firm conclusions To better understand the distribution of amphibians and reptiles in Maryland and forecast species futures in a time of accelerated environmental threats conducting a comprehensive statewide survey updating 1970s era distribution maps seemed ideal However this endeavor was of an impossibly ambitious scope for scientists alone to tackle Enter the Maryland Amphibian and Reptile Atlas project comprising nearly a thousand dedicated citizen scientists who discovered and recorded the locations of herpetofauna throughout every corner of Maryland In *The Maryland Amphibian and Reptile Atlas* Heather R Cunningham and Nathan H Nazdrowicz present the findings of this massive undertaking This definitive guide combines nearly 160 comprehensive new herpetological maps with historical distribution maps and in depth species accounts Color photos illustrate the natural history of the 89 species of frogs salamanders turtles snakes and lizards that call the state home Essays discuss historical studies the effects of Maryland s current climate geology and habitat diversity and the myriad conservation issues these animals face This richly detailed book represents a triumph of citizen

science and the culmination of an intensive research partnership It will appeal to both amateurs and professionals interested in herpetology natural history or ecology as well as those with a special interest in Maryland s biodiversity [EPA National Publications Catalog](#) United States. Environmental Protection Agency,2003 *Nature in Fragments* Elizabeth Ann Johnson,Michael W. Klemens,2005 This new collection focuses on the impact of sprawl on biodiversity and the measures that can be taken to alleviate it Leading biological and social scientists conservationists and land use professionals examine how sprawl affects species and alters natural communities ecosystems and natural processes The contributors integrate biodiversity issues concerns and needs into the growing number of anti sprawl initiatives including the smart growth and new urbanist movements
