From Tribes to Nation James B. Collins, 2002 A SURVEY OF FRENCH HISTORY is the only textbook on the history of France to cover the period from Clovis through the French Revolution This narrative survey of French history features an integration of social cultural economic and political history Revolutionary France's War of Conquest in the Rhineland Jordan R. Hayworth, 2019-02-06 In May 1790 the French National Assembly renounced wars of conquest Two years later France declared war on Austria and invaded Belgium and the Rhineland claiming it was to spread the benefits of the Revolution Soon however military and economic crises drove a shift in the nature of France's war effort What started as a war for liberty became a war for conquest one that brought devastating exploitation to the Rhineland It was during this time that French foreign policy became influenced by the idea of attaining the natural frontiers the Alps the Pyrenees and most significantly the Rhine Although often portrayed as a diplomatic tradition of the French monarchy Jordan R Hayworth shows how the natural frontiers policy was born during the Revolution In addition he examines the intense and consequential debates that arose over the policy which caused much confusion in the war and helped to undermine France's democratic experiment Using Concepts in Medieval History Jackson W. Armstrong, Peter Crooks, Andrea Ruddick, 2022-01-24 This book is the first of its kind to engage explicitly with the practice of conceptual history as it relates to the study of the Middle Ages exploring the pay offs and pitfalls of using concepts in medieval history Concepts are indispensable to historians as a means of understanding past societies but those concepts conjured in an effort to bring order to the infinite complexity of the past have a bad habit of taking on a life of their own and inordinately influencing historical interpretation The most famous example is feudalism whose fate as a concept is reviewed here by E A R Brown nearly fifty years after her seminal article on the topic The volume's contributors offer a series of case studies of other concepts colony crisis frontier identity magic networks and politics that have been influential particularly among historians of Britain and Ireland in the later Middle Ages The book explores the creative friction between historical ideas and analytical categories and the potential for fresh and meaningful understandings to emerge from their dialogue Real Lives in the Sixteenth Century Rebecca Ard Boone, 2018-04-19 Real Lives in the Sixteenth Century presents a global history using four sets of biographies to illustrate similar situations in different geographical regions The vibrant narratives span four continents and include the following pairs Henry IV of France and Hideyoshi of Japan H rrem Sultan Roxelana of the Ottoman Empire and Lady Zheng of the Ming Dynasty Afonso I of Kongo and Elizabeth I of England and Pope Clement VII and Moctezuma II of Mexico Through exploring the lives of eight individuals from a variety of cultural settings this book encourages students to think about the big questions surrounding human interactions and the dynamics of power It introduces them to a number of key historical concepts such as feudalism dynasticism religious syncretism and slavery and is a springboard into the history of the wider world blending together aspects of political cultural intellectual and material history Accessibly written and containing timelines

genealogical tables and a number of illustrations for each biography Real Lives in the Sixteenth Century is the ideal introductory text for undergraduates of pre modern World History and of the sixteenth century in particular

The Foundations of Modern Terrorism Martin A. Miller, 2012-11-29 Why is it that terrorism has become such a central factor in our lives despite all the efforts to eradicate it? Ranging from early modern Europe to the contemporary Middle East, Martin Miller reveals the foundations of modern terrorism. He argues that the French Revolution was a watershed moment as it was then that ordinary citizens first claimed the right to govern. The traditional notion of state legitimacy was forever altered and terrorism became part of a violent contest over control of state power between officials in government and insurgents in society. In the nineteenth and twentieth centuries, terrorism evolved into a way of seeing the world and a way of life for both insurgents and state security forces, with the two sides drawn ever closer in their behaviour and tactics. This is a groundbreaking history of terrorism which for the first time integrates the violence of governments and insurgencies.

State Formation in Europe, 843-1789 Sverre Bagge, 2019-06-03 *State Formation in Europe 843-1789* follows the formation and development of the European state from the division of the Carolingian Empire to the French Revolution. The book's primary focus is on Europe's patterns of internal and external development in comparison to political organization in other parts of the world. By analysing Europe as a single unit rather than dividing it into nation states, it reveals the broader historical connections within the Continent. Bagge takes the reader through a discussion of how kingdoms evolved into states, introducing the influence of the Church and the town on these state structures. The relationship between state, Church, and town is traced to explain how these different power struggles played out and why the territorial state became the dominant form of organization. Finally, the book clarifies why Europe developed in this way and the global consequences of this development. By observing Europe through the perspective of the rest of the world, readers gain insight into trends common to the whole Continent while crossing the traditional border between the Middle Ages and early modern period. This book is essential reading for students studying medieval and early modern political history, state formation, and Europe in a global context.

The King's Bench Zoë A. Schneider, 2008 An examination of kings' courts and lords' courts in Normandy that opens a new chapter in the debate over absolutism, sovereignty, and the nature of the state in early modern France. Hidden deep in the countryside of France lay early modern Europe's largest bureaucracy: twenty to thirty thousand royal bailiwick and seigneurial courts that served more than eighty-five percent of the king's subjects. The crown courts and lords' courts were far more than arenas of litigation in the modern sense. They had become the nexus of local governance by the middle of the seventeenth century, a rich breeding ground for men who controlled the villages, towns, and bailiwicks of France. Yet even as the centralizing state was reaching its zenith

under Louis XIV the king's largest permanent bureaucracy became increasingly alienated and cut adrift from the crown many decades before the French Revolution In *The King's Bench* Zo Schneider vividly brings to life the teeming world of the local courts with their magistrates and jailers townspeople and peasants Together they contested that vital border where the private world of families and property collided with the public commonwealth Schneider chronicles the transformation of local governance after the mid seventeenth century as judges and their courts became the face of public order in the countryside With this richly detailed local study of Normandy in the seventeenth and early eighteenth centuries Zo Schneider opens a new chapter in the debate over absolutism sovereignty and the nature of the state in early modern France Zo A Schneider has taught at Georgetown University and with the Smithsonian Institution in Washington D C *War and Peace and War* Peter Turchin,2007-02-27 From the author of *End Times* In *War and Peace and War* Peter Turchin uses his expertise in evolutionary biology to offer a bold new theory about the course of world history Turchin argues that the key to the formation of an empire is a society's capacity for collective action He demonstrates that high levels of cooperation are found where people have to band together to fight off a common enemy and that this kind of cooperation led to the formation of the Roman and Russian empires and the United States But as empires grow the rich get richer and the poor get poorer conflict replaces cooperation and dissolution inevitably follows Eloquently argued and rich with historical examples *War and Peace and War* offers a bold new theory about the course of world history with implications for nations today *A Revolution in Taste* Susan Pinkard,2009 This book traces the development of modern French habits of cooking eating and drinking from their roots in the Ancien Regime Pinkard examines the interplay of material culture social developments medical theory and Enlightenment thought in the development of French cooking which culminated in the creation of a distinct culture of food and drink *Luther's Legacy* Robert von Friedeburg,2016-02-04 In this new account of the emergence of a distinctive territorial state in early modern Germany Robert von Friedeburg examines how the modern notion of state does not rest on the experience of a bureaucratic state apparatus It emerged to stabilize monarchy from dynastic insecurity and constrain it to protect the rule of law subjects and their lives and property Against this background Lutheran and neo Aristotelian notions on the spiritual and material welfare of subjects dominating German debate interacted with Western European arguments against despotism to protect the lives and property of subjects The combined result of this interaction under the impact of the Thirty Years War was Seckendorff's *Der Deutsche Fürstenstaat* 1656 constraining the evil machinations of princes and organizing the detailed administration of life in the tradition of German Policey and which founded a specifically German notion of the modern state as comprehensive provision of services to its subjects **Pan African Spaces** Loy Azalia,Msia Kibona Clark,Phiwokuhle Mnyandu,2018-12-11 This book explores Black identity from a global perspective The historical and contemporary migrations of African peoples have brought up some interesting questions regarding identity This text examines some of those questions and will provide relevant essays on the identities created by those migrations Following a

regional contextualizing of migration trends the personal essays will allow for understandings of how those migrations impacted personal and community identities Each of the personal essays will be written by bicultural Africans Blacks from around the world The essays represent a wide spectrum of experiences and viewpoints central to the bicultural Africans Black experience The contributors offer poignant and grounded perspectives on the diverse ways race ethnicity and culture are experienced debated and represented All of the chapters contribute more broadly to writings on dual identities and the various ways bicultural Africans Blacks navigate their identities and their places in African and Diaspora communities
