THE FATAL FLAWS OF
GERMAN GENERALSHIP FROM
MOLTKE TO GUDERIAN
KENNETH MACKSEY

From Triumph To Disaster The Fatal Flaws Of German Generalship From Moltke To Guderian

AW Rasmussen

From Triumph To Disaster The Fatal Flaws Of German Generalship From Moltke To Guderian:

From Triumph to Disaster Kenneth Macksey, 1996 The mighty German armed forces have twice this century been forced from the brink of victory to defeat Was this inevitable given their structure leadership and history Kenneth Macksey examines the inherent flaws in the German military system and its generalship focusing on the two World Wars but also taking into account major preceding events such as the Seven Years War the Napoleonic Wars and the Danish Austrian and Franco Prussian wars A nation that traditionally had to struggle to survive in territory with few natural defensive boundaries Germany developed an aggressive and arrogant outlook which led it via initial successes in the 1860s and 1870s to dreams of world domination causing overstretch and disaster Macksey highlights the German military's tendency to underestimate the enemy and believe its own propaganda its failure to adopt a war policy far reaching enough to sustain anything other than short wars the immense political power wielded by the military staffs and many other factors that history has shown damaged Germany's chances of success in war Set against these flaws was the brilliance of individual generals and military thinkers the innovative development of the military forces and the skill and tenacity of the men who did the fighting Macksey inspects the reasons for the actions of the great German commanders including Scharnhorst Clausewitz Moltke Hindenburg Ludendorff Kesselring Guderian Rommel Manstein and many others as well as their Kaisers and of course Adolf Hitler

Planning for Conflict in the Twenty-First Century Brian Hanley, 2007-11-30 This book aims to serve the military profession and so the national interest by helping to generate intelligent reform of how the armed forces train educate and promote officers who shape our military strategy and write our war plans Readers will discover the professional and intellectual improvement that wide reading in the masters of historical narrative offers to them The first chapter Lessons Not Learned surveys our strategic documents and their recent applications and offers criticism and recommendations The second chapter Transformation Ballyhoo evaluates our current efforts at military transformation and offers an alternative approach to rehabilitating our armed forces The third chapter The Brain of An Army offers ideas on building a first rate Joint War College Chapters four through six focus on military campaigns France 1940 Stalingrad North Africa 1940-43 The theme is that moral and intellectual qualities determine the fate of armies in war and that material and bureaucratic machinery are not nearly so vital as we seem to think nowadays

Cavalry from Hoof to Track Roman Jarymowycz, 2007-12-30 For centuries mounted cavalry dominated the battlefield through shock and mobility Man maintained a symbiotic relationship with the horse which became particularly sacrosanct on the battlefield and even created a new exalted social class These mounted warriors sought to preserve their prestige despite the advent of new technologies threatening to render them obsolete In *Cavalry from Hoof to Track* Roman Jarymowycz traces the evolution of the cavalry from the warhorse to the armored tank and demonstrates how its survival is a history of determined and creative responses to the changing dynamics of modern warfare Ultimately he argues the very concept of cavalry exists as its own state of mind The cavalry and its

doctrine are misunderstood and its tactics and operations remain a mystery for many civilians New technology and the increased integration of the armed forces create the illusion that the cavalry no longer exists as a distinct military entity and philosophy Jarymowycz clarifies these misconceptions by offering a comprehensible overview while explaining military terminology and outlining basic cavalry principles The book concludes by suggesting how the cavalry will continue to evolve in response to contemporary third world conflicts perhaps even reverting to its original tactical role of close quarter combat

Night of the Long Knives Paul Maracin,2007-07-01 Many wonder how Adolf Hitler a mediocre army corporal and failed landscape painter could have become the architect of the most calamitous events of the twentieth century But fewer know that Hitler's fateful transition from ambitious demagogue to Europe's most vicious tyrant occurred on an ordinary Saturday June 30 1934 in a little known event that would come to be called The Night of the Long Knives This is the story of the events leading up to that awful event and its most horrifying repercussions

The Fire Jörg Friedrich,2008 In the final phase of the World War II the Allies launched a bombing campaign that inflicted unprecedented destruction on Germany This work attempts to document life under the Allied bombing and renders the annihilation of cities such as Dresden

Caporetto and the Isonzo Campaign John Macdonald,Željko Cimpric,2011-12-13 This illustrated WWI history sheds light on a major

campaign fought along the significant yet often neglected Italian Front From 1915 to 1917 the armies of Italy and the Austro Hungarian Empire were locked in a series of battles along the River Isonzo a sixty mile front from the Alps to the Adriatic Sea The campaigns were fought in unforgiving terrain with casualty counts that exceeded those of the Great War's more famous battles The twelfth and final battle Caporetto was a major victory for the Central Powers as they broke through the Italian Front

Historian John Macdonald chronicles the Isonzo battles with vivid descriptions of the battlefields and of the atrocious conditions in which the soldiers fought The text is supported by a selection of original photographs that record the terrible reality of the conflict The intervention of British French and German troops is covered as are the parts played by famous individuals including Erwin Rommel Benito Mussolini Pietro Badoglio and Luigi Cadorna the notorious Italian commander in chief Caporetto and the Isonzo Campaign examines an aspect of the First World War that was pivotal in the history of Italy Austria and the Balkans

 store mennesketab Jahresberichte für deutsche Geschichte ,1997 **Why the Germans Lose at War** Kenneth
 Macksey, 1999 The reasons for actions that have shaped world history revealing the flawed brilliance of German generalship
 in World War II and why German overconfidence led to military defeat *Victories Are Not Enough* Samuel J.
 Newland, 2005-12-30 Since the early 1940s the students of military operations in general and from the United States in
 particular have studied German military operations While some of these studies have dealt with the wars of the imperial era
 particularly the Wars of German Unification 1864-71 much more study has centered on the wars waged by the Third Reich
 from 1939-45 From these studies lessons have been extracted and military doctrine has been influenced Regrettably however
 as the German way of war has been studied too often those studies have focused on the tactical or the operational levels of
 war The exploits the victories of German operational leaders such as Erwin Rommel Heinz Guderian and Eric von Manstein
 have been traditional favorites And while the Germans have clearly influenced warfare on this level even the casual observer
 should have noticed that the Germans fought two major wars in the 20th century and lost both of them the second with
 disastrous consequences Thus the question emerges What was wrong with the oft studied German way of war A significant
 factor in their military failure can be laid at the top with both their civilian and military leadership For while the Germans
 have excelled tactically and operationally they have exhibited significant weaknesses in developing achievable goals for their
 nation and appropriate strategies for achieving these goals In the time that stretched from the beginning of the 1860s until
 the end of World War II Germany only had one brief period when it could bask in the glory of the European leadership it so
 desired That brief period was from 1871 until 1890 when Otto von Bismarck was Chancellor Following Bismarck and Chief of
 the German General Staff Helmuth von Moltke the German record of setting achievable goals and developing and following
 logical strategies is poor This Letort Paper is designed to explore these issues and provide an overview of the development of
 Germany as a nation and German military thought in the 19th century It examines the origins of modern German military

thinking and the concepts promoted by some of Germany's key military and political leadership. It emphasizes that if a nation is unwilling or incapable of designing logical strategies, tactical and operational victories in the field will come to naught.
