## **From Words To Numbers Narrative Data And Social Science:**

**From Words to Numbers** Roberto Franzosi, 2004-05-24 Departing radically from traditional content analysis approaches to the quantitative study of texts this work is based on a linguistic theory of narrative rather than the ad hoc approaches of context analysis The book illustrates a set of tools story grammars relational data models and network models that can be profitably used for the collection organization and analysis of narrative data in socio historical research e g narratives of strikes demonstrations lynchings and riots [From Words to Numbers](#) Roberto Franzosi, 2004-05-24 This book offers a way to analyze narrative data in socio historical research [Handbook of Data Analysis](#) Melissa A Hardy, Alan Bryman, 2009-06-17 This book provides an excellent reference guide to basic theoretical arguments practical quantitative techniques and the methodologies that the majority of social science researchers are likely to require for postgraduate study and beyond Environment and Planning The book provides researchers with guidance in and examples of both quantitative and qualitative modes of analysis written by leading practitioners in the field The editors give a persuasive account of the commonalities of purpose that exist across both modes as well as demonstrating a keen awareness of the different things that each offers the practising researcher Clive Seale Brunel University With the appearance of this handbook data analysts no longer have to consult dozens of disparate publications to carry out their work The essential tools for an intelligent telling of the data story are offered here in thirty chapters written by recognized experts Michael Lewis Beck F Wendell Miller Distinguished Professor of Political Science University of Iowa This is an excellent guide to current issues in the analysis of social science data I recommend it to anyone who is looking for authoritative introductions to the state of the art Each chapter offers a comprehensive review and an extensive bibliography and will be invaluable to researchers wanting to update themselves about modern developments Professor Nigel Gilbert Pro Vice Chancellor and Professor of Sociology University of Surrey This is a book that will rapidly be recognized as the bible for social researchers It provides a first class reliable guide to the basic issues in data analysis such as the construction of variables the characterization of distributions and the notions of inference Scholars and students can turn to it for teaching and applied needs with confidence The book also seeks to enhance debate in the field by tackling more advanced topics such as models of change causality panel models and network analysis Specialists will find much food for thought in these chapters A distinctive feature of the book is the breadth of coverage No other book provides a better one stop survey of the field of data analysis In 30 specially commissioned chapters the editors aim to encourage readers to develop an appreciation of the range of analytic options available so they can choose a research problem and then develop a suitable approach to data analysis **Older People and Migration** Susan Lawrence, Sandra Torres, 2017-10-02 With neo liberal resource rationing and the onus of cost shifting from the state to individuals families and communities migration issues can add a further layer of complexity to the question of caring for the elderly By presenting examples from a variety of contexts and countries this book will stimulate readers into considering new

approaches to their own local situation in an attempt to find sustainable social work responses and in helping to build intergenerational solidarity and social capital Contributions to the book focus on patterns of migration older migrants migrating families and migrant carers Facilitating and supporting social solidarity both locally and internationally requires social workers to understand the different contexts for elderly social work both within their own country and internationally Central to this area of work is the promotion of values that respect differences and uphold the principles of human rights and social justice This book highlights the need to consider migration as a driver for social change offering the opportunity for new forms of social solidarity that can adapt and support people inter generationally and sustainably in later life This book was originally published as a special issue of the European Journal of Social Work

**Mapping Policy Preferences from Texts** Andrea Volkens, Judith Bara, Ian Budge, Michael D. McDonald, Hans-Dieter Klingemann, 2013-11-28 The Manifesto data are the only comprehensive set of policy indicators for social economic and political research It is thus vital that their quality is established The purpose of this book is to review methodological issues that have got in the way of straightforwardly using the Manifesto data since our two preceding volumes were published and to resolve them in ways which best serve users and textual analysts in general The book is thus generally about text based quantitative analysis with a particular focus on the quality of the CMP MARPOR data and ways of assessing and using them In doing so the book goes beyond normal data documentation essential though that is to confront the analytic issues faced by users of the data now distributed by MARPOR It also provides concrete strategies for tackling these at the research level with examples from the field of political representation The problems of uncertainty error reliability and validity considered here are generic issues for political analysts in any area of research so the book has an interest extending beyond the Manifesto estimates themselves in particular to other textual analyses In addition the book widens the range of applications introduced in our two previous volumes and discusses the extension of the manifesto project database to cover Latin America

[Annual Review of the Sociology of Religion. Volume 3 \(2012\)](#), 2012-08-24 This volume points to methodological innovations in social research and their potential for social scientific studies of religion Computerization has opened for both quantitative and qualitative systematic analyses of complex materials and the epistemological discourse after Positivism has opened for reconsidering the foundation of empirical social research Furthermore religion is changing and sociology of religion therefore widens its scope by including non institutional forms of religion This refocusing calls for new methodological considerations As the range of available methods expands it becomes more pressing to consider whether and how methods can be combined such as quantitative and qualitative methods Studying religion as a complex social phenomenon calls for a variety of methods but an integration of the empirical findings points back to the epistemological issue

**Contentious Performances** Charles Tilly, 2008-08-04 How can we get inside popular collective struggles and explain how they work Contentious Performances presents a distinctive approach to analyzing such struggles drawing especially on incomparably rich evidence from Great Britain between 1758 and 1834 The book accomplishes three main things First it presents a logic and method for describing contentious events occasions on which people publicly make consequential claims on each other Second it shows how that logic yields superior explanations of the dynamics in such events both individually and in the aggregate Third it illustrates its methods and arguments by means of detailed analyses of contentious events in Great Britain from 1758 to 1834 Mobilizing on the Extreme Right Manuela Caiani, Donatella della Porta, Claudius

Wagemann, 2012-02-16 Research on the extreme right is rare and the extreme right has even more rarely been analysed as a social movement In this volume the extreme right is compared in Italy Germany and the United States using concepts and methods developed in social movement studies In particular the book describes the discourse action and organizational structures of the extreme right and explains these on the basis of the available discursive and political opportunities Three main empirical methods are used in the research Firstly the frame analysis looks at the cognitive mechanisms that are relevant in influencing organizational and individual behaviour Second network analysis looks at the inter organizational structural characteristics of right wing organizations Finally protest event analysis allows for an empirical summary of the actions undertaken by right wing extremists over the last decade The substantive chapters address the organizational structure of the extreme right their action repertoires the framing of protest events the definition of us the struggle against modernity old and new forms of racism opposition to globalization and populism **Studying Human Rights** Todd

*Becoming Activists in Global China* Andrew Junker, 2019-02-21 *Becoming Activists in Global China* is the first purely sociological study of the religious movement Falun Gong and its resistance to the Chinese state The literature on Chinese protest has intensively studied the 1989 democracy movement while largely ignoring opposition by Falun Gong even though the latter has been more enduring This comparative study explains why the Falun Gong protest took off in diaspora and the democracy movement did not Using multiple methods *Becoming Activists in Global China* explains how Falun Gong s roots in proselytizing and its ethic of volunteerism provided the launch pad for its political mobilization Simultaneously diaspora democracy activists adopted practices that effectively discouraged grassroots participation The study also shows how the policy goal of eliminating Falun Gong helped shape today s security focused Chinese state Explaining Falun Gong s two decades of protest illuminates a suppressed piece of Chinese contemporary history and advances our knowledge of how religious and political movements intersect
