 G. Lee, 2017-12-10 While public debates over America's current foreign policy often treat American empire as a new
 phenomenon this lively collection of essays offers a pointed reminder that visions of national and imperial greatness were a
 cornerstone of the new country when it was founded In fact notions of empire have long framed debates over western
 expansion Indian removal African slavery Asian immigration and global economic dominance and they persist today despite
 the proliferation of anti-imperialist rhetoric In fifteen essays distinguished historians examine the central role of empire in
 American race relations nationalism and foreign policy from the founding of the United States to the twenty-first century The
 essays trace the global expansion of American merchant capital the rise of an evangelical Christian mission movement the
 dispossession and historical erasure of indigenous peoples the birth of new identities and the continuous struggles over the
 place of darker-skinned peoples in a settler society that still fundamentally imagines itself as white Full of transnational
 connections and cross-pollinations of people appearing in unexpected places the essays are also stories of people being put
 quite literally in their place by the bitter struggles over the boundaries of race and nation Collectively these essays
 demonstrate that the seemingly contradictory processes of boundary crossing and boundary making are and always have
 been intertwined Contributors James T. Campbell Brown University Ruth Feldstein Rutgers University Newark Kevin K.

 shows that blood symbolism stands at the center of the divide between Judaism and Christianity This book will be the point of

departure for all future studies of the subject Shaye J D Cohen Harvard University I know of no other work that through numerous insights and useful distinctions so alerts us to and comprehensively documents the ongoing constitutive role of Christian and anti Semitic perceptions of Jewish existence and the interactions between them Whereas much contemporary historiography has become so specialized that historians have surrendered the larger picture David Biale's panoramic perspective reveals the great value and interest of this work Steven E Aschheim author of *Beyond the Border The German Jewish Legacy Abroad* *Origins and Traditions in Comparative Education* Maria Manzon, 2020-05-21 This volume aims to expand knowledge about the history of comparative education It explores new scholarship on key actors and ways of knowing in the field It aims to raise awareness on the positionality of historical narratives about this field of inquiry and offers a re think of its histories Since comparative education has always been embedded within a global field of power what would the changing world order's implications be for the institutional and intellectual histories of the field This book offers diverse perspectives for re theorising the histories of comparative education It suggests casting a far sighted and panoramic look at the field's origins The volume concludes with a puzzle for future work on a global history of comparative education This book was originally published as a special issue of *Comparative Education* **"Is the Turk a White Man?"** Murat

Ergin, 2016-09-27 In 1909 the US Circuit Court in Cincinnati set out to decide whether a Turkish citizen shall be naturalized as a white person the New York Times article on the decision discussing the question of Turks' whiteness was cheekily entitled *Is the Turk a White Man* Within a few decades having understood the importance of this question for their modernization efforts Turkish elites had already started a fantastic scientific mobilization to position the Turks in world history as the generators of Western civilization the creators of human language and the forgotten source of white racial stock In this book Murat Ergin examines how race figures into Turkish modernization in a process of interaction between global racial discourses and local responses *Hitler's Ethic* R. Weikart, 2009-07-20 In this book Weikart helps unlock the mystery of Hitler's evil by vividly demonstrating the surprising conclusion that Hitler's immorality flowed from a coherent ethic Hitler was inspired by evolutionary ethics to pursue the utopian project of biologically improving the human race

focusing on the structural and ideological links between fascism capitalism and modernity Intended as a critical discussion of the origins and development of fascist ideology each chapter deals with a core substantive issue in political theory relevant to the study of fascism and totalitarianism beginning with an assessment of the current state of debate The emphasis on formal ideology in contemporary Anglo American historiography has increased our awareness of the complexity and eclectic nature of fascist ideologies which challenge liberalism and social democracy Yet in too many recent works a programmatic or essentialist reading of fascist ideology as a secular religion is taken for granted while researchers remain preoccupied with the search for an elusive fascist minimum In this book Woodley emphasizes that many outstanding questions remain including the structural and ideological links between fascism and capitalism the social construction of fascist nationalism and the origins of fascist violence in European colonialism This volume consolidates the reader s theoretical understanding and provides the interdisciplinary skills necessary to understand the concrete social economic and political conditions which generate and sustain fascism A timely critique of culturalist and revisionist approaches in fascism studies which provides a concise overview of theoretical debates between liberalism Marxism and poststructuralism this text will be of great interest to students of politics modern history and sociology

Iraq at a Distance Antonius C. G. M. Robben, 2010-11-24 The Iraq War has cost innumerable lives caused vast material destruction and inflicted suffering on millions of people Iraq at a Distance What Anthropology Can Teach Us About the War focuses on the plight of the Iraqi people caught since 2003 in the carnage between U S and British troops on one side and on the other Iraqi insurgents militias and foreign al Qaeda operatives The volume is a bold attempt by six distinguished anthropologists to study a war zone too dangerous for fieldwork They break new ground by using their ethnographic imagination as a research tool to analyze the Iraq War through insightful comparisons with previous and current armed conflicts in Cambodia Israel Palestine Northern Ireland Afghanistan and Argentina This innovative approach extends the book s relevance beyond a critical understanding of the devastating war in Iraq More and more parts of the world of long standing ethnographic interest are becoming off limits to researchers because of the war on terror This book serves as a model for the study of other inaccessible regions and it shows that the impossibility of conducting ethnographic fieldwork does not condemn anthropologists to silence Essays analyze the good versus evil framework of the war on terror the deterioration of women s rights in Iraq under fundamentalist coercion the ethnic religious partitioning of Baghdad through the building of security walls the excessive use of force against Iraqi civilians by U S counterinsurgency units and the loss of popular support for U S and British forces in Iraq and Afghanistan after the brutal regimes of the Taliban and Saddam Hussein had been toppled

In the Museum of Man Alice L. Conklin, 2013-10-04 In the Museum of Man offers new insight into the thorny relationship between science society and empire at the high water mark of French imperialism and European racism Alice L Conklin takes us into the formative years of French anthropology and social theory between 1850 and 1900 then deep into the practice of anthropology under the name of ethnology both in Paris and in the empire before and especially after World War I and finally into the fate of the discipline and its practitioners under the German Occupation and its immediate aftermath Conklin addresses the influence exerted by academic networks museum collections and imperial connections in defining human diversity socioculturally rather than biologically especially in the wake of resurgent anti-Semitism at the time of the Dreyfus Affair and in the 1930s and 1940s Students of the progressive social scientist Marcel Mauss were exposed to the ravages of imperialism in the French colonies where they did fieldwork as a result they began to challenge both colonialism and the scientific racism that provided its intellectual justification Indeed a number of them were killed in the Resistance fighting for the humanist values they had learned from their teachers and in the field A riveting story of a close knit community of scholars who came to see all societies as equally complex In the

Museum of Man serves as a reminder that if scientific expertise once authorized racism anthropologists also learned to rethink their paradigms and mobilize against racial prejudice a lesson well worth remembering today *The Extermination of the European Jews* Christian Gerlach, 2016-03-17 A major new interpretation of the Holocaust contextualizing the destruction of the Jews within Nazi violence against other groups
