Making Connections Margaret Walsh, 2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion
