From Russia To Ussr And Beyond:

From Russia to USSR and Beyond Janet G. Vaillant, John Richards, 1993 Russia Beyond Communism Vladislav Krasnov, W. George Krasnow, 2019-07-11 Vladislav Krasnov's book comes at the right moment to give American readers help in understanding the momentous changes taking place in the Russian heartland of the Soviet Union. What do they portend? When Western eyes were fixed by the media on the Gorbachev phenomenon and the perestroika slogan, Dr Krasnov was drawing our attention instead to the rapid coming of the future beyond Gorbachev. His timely analysis looked past the vain attempt of this last of the Soviet Marxian princes at salvaging Communism and on to the new world being born today in the ancestral lands of Russia.

A History of Russia, the Soviet Union, and Beyond David MacKenzie, Michael W. Curran, 1993 The HISTORY OF RUSSIA AND THE SOVIET UNION is a general survey of Russian history from earliest times to the present. The authors present a balanced coverage of political, diplomatic, economic, social, intellectual, and cultural history.

Beyond Memory Diane Neumaier, 2004 Photography possesses a powerful ability to bear witness, aid remembrance, shape and even alter recollection. In *Beyond Memory: Soviet Nonconformist Photography and Photo-Related Works of Art*, the general editor Diane Neumaier and twenty-three contributors offer a rigorous examination of the medium's role in late Soviet unofficial art. Focusing on the period between the mid 1950s and the late 1980s, they explore artists' unusually inventive and resourceful uses of photography within a highly developed Soviet dissident culture. During this time, lack of high-quality photographic materials, complemented by tremendous creative impulses, prompted artists to explore experimental photo processes such as camera and darkroom manipulations, photomontage, and hand coloring. Photography also took on a provocative array of forms, including photo installation, artist-made samizdat, self-published books, photo-realist painting, and many other surprising applications of the flexible medium. *Beyond Memory* shows how innovative conceptual moves and approaches to form and content echo Soviet society's coded communication and a Russian sense of absurdity were common in the Soviet cultural underground. Collectively, the works in this anthology demonstrate how late Soviet artists employed irony and invention to make positive use of difficult circumstances. In the process, the volume illuminates the multiple characters of photography itself and highlights the leading role that the medium has come to play in the international art world today. *Beyond Memory* stands on its own as a rigorous examination of photography's place in late Soviet unofficial art while also serving as a supplement to the traveling exhibition of the same title.

India-Mongolia Relations: Beyond Greater Central Asia Sureyya Yigit, Dr R Srinivasan, 2023-05-01 India has emerged as a confident and engaging partner in the international arena, metamorphosing from the image of a reluctant power in the late 20th century to reflecting a realization by its polity of the potential and benefits of such engagements in India's larger interests. This book attempts to bridge this gap, drawing on a broad range of schools of thoughts and a

number of different approaches it presents the learned views of scholars applying a variety of methodological techniques While keeping Mongolia at the centre of interest the scholarly approaches look at India s Look East and Look North Policies Mongolia s relations with Russia the Third Neighbour Dilemma USA Mongolia relations and India Tajik relations including the play of soft power in international relations

Beyond US Hegemony Samir Amin,2013-04-04 In this major new work the result of a lifetime of intellectual engagement one of the developing world s most famous thinkers reflects on the times we live in He argues that US hegemony has reached a dangerous new level under George Bush Jr and that the US President s hubristic militarism will both lead to a never ending cycle of wars and block all hopes of social and democratic progress not just in developing countries but in the North as well Samir Amin also rejects the highly ideological notion that the current form of neoliberal capitalism really existing capitalism in which imperialism is an integral and permanent part is an inevitable future for humanity or in fact socially or politically tolerable At the same time he is not opposed to globalization as such indeed he believes the whole world today is irrevocably connected and that solidarity in diversity is the key to the struggle for a better world In the body of the book Amin provides a perspicacious analysis of tendencies within the rich countries the US Europe and Japan the rising powers China and India the likely future trajectory of post Soviet Russia and the developing world The central question he pursues is whether there are other hegemonic blocs that may emerge in time to circumscribe American power and constrain free market capitalism and force it to adjust to demands other than its narrow central economic logic This important and thought provoking book identifies the key global campaigns Samir feels progressives should launch around the world Another world is possible But he warns the diverse citizens movements loosely gathered together in the World Social Forum must bite the political bullet and recognise that they can only transform the world if they seek political power

Beyond Crimea Agnia Grigas,2016-02-16 How will Russia redraw post Soviet borders In the wake of recent Russian expansionism political risk expert Agnia Grigas illustrates how for more than two decades Moscow has consistently used its compatriots in bordering nations for its territorial ambitions

Demonstrating how this policy has been implemented in Ukraine and Georgia Grigas provides cutting edge analysis of the nature of Vladimir Putin's foreign policy and compatriot protection to warn that Moldova Kazakhstan the Baltic States and others are also at risk **Movement, Power and Place in Central Asia and Beyond** Madeleine Reeves, 2013-09-13

Central Asia is a region singularly marked by attempts to transform social life by transforming place Drawing together established scholars and a new generation of historians geographers and anthropologists this volume brings empirical specificity and theoretical depth to debates about the politics of place making in this diverse region making an important contribution to Central Asian studies and a distinctive regional comparison to the spatial turn in social analysis Case studies draw on archival research and oral history to explore the workings and unintended consequences of policies aimed at sedentarizing collectivizing and resettling populations as a means to fix and territorialize space The book also examines ethnographic studies attuned to the role of movement in sustaining social life from Soviet era trade networks that linked rural Central Asia and the Russian metropolis to pilgrimage routes through which kazakhness is articulated to the contemporary moralization of migration abroad in search of work Rather than analysing flows as abstract processes the book enquires about effortful activity material infrastructures political relations and social habits through which people ideas knowledge skills and material objects move or are prevented from moving As such it offers new insights into the complex intersections of movement power and place in this important region over the last two centuries This book was originally published as a special issue of *Central Asian Survey* *Qur'an Translations in the Eastern Bloc and Beyond* Elvira

Kulieva, Johanna Pink, Mykhaylo Yakubovych, 2025-05-21 This book offers the first comprehensive exploration of Qur'an translations across the diverse landscapes of the former Eastern Bloc from Uzbekistan to the German Democratic Republic With a focus on how Islamic texts have been shaped by state policies ideological shifts and religious identities it traces connections between these regions and the wider world including Saudi Arabia Turkey and China This volume draws on perspectives from both Sunni and Shia traditions as well as contributions by non Muslim scholars Through archival research and close textual analysis the contributors demonstrate how translations of the Qur'an have served not only as religious texts but also as reflections of profound transformations in national and religious identities in communist and post communist societies Qur'an translations have gained prominence within the modern Muslim publishing world and their analysis reveals a dynamic interplay between local politics and global Islamic discourse They have become symbols of religious resurgence cultural renewal and intellectual exchange but also objects of persecution and contestation Based on multilingual sources this collection is an essential resource for understanding Qur'an translations as a significant scholarly and cultural phenomenon in the modern era *Beyond Eastern Noir* Anna Estera Mrozewicz, 2018-03-07 Addressing representations of

Russia and neighbouring Eastern Europe in post 1989 Nordic cinemas this ground breaking book investigates their hitherto overlooked transnational dimension **Federalism beyond Federations** Ferran Requejo, Nagel Klaus-Jürgen, 2016-04-15

Since the end of the Second World War a set of democratic European countries have established a decentralized system of government based on federal or regional patterns. Some of these systems initially displayed an asymmetrical trend; however, some democracies have implemented a subsequent process of re-symmetrization that changes the structure and the legitimization of the previous political agreements. Charting the evolution of decentralization processes and asymmetries implemented in Belgium, Denmark, Finland, France, Italy, Portugal, Russia, Spain, Ukraine, and the United Kingdom, leading international scholars illustrate which countries have evolved more symmetrically, why this is so, and what the role of political actors in these processes have been. In doing so, each case study examines the causes of the legal and constitutional asymmetries and the main political cleavages. Analyses the main institutions, actors, and factors that influence the political dynamics of the territorial debate. Questions whether there is such a process of re-symmetrization. Presents the main actors in favour of the process of re-symmetrization and of maintaining the constitutional and legal asymmetries. Written accessibly and contributing to key debates on federalism and asymmetry. **Beyond Sand and Oil** Federalism beyond Federations appeals to academics, politicians, decision makers, and all those interested in the political problems facing modern democracies. **Beyond Sand and Oil** Jack Caravelli, 2011-01-20 This text provides an up-to-date overview of nuclear weapons in the politically fragile Middle East, discussing the evolution and future of national programs as well as the current challenge posed by Iran. Shortly after World War II, the Middle East became a locus for nations seeking to acquire nuclear missiles and the means to deliver them to their enemies. Israel was the first, Libya and Iraq followed suit. Pakistan now possesses a substantial number of nuclear weapons, to which longtime rival India will no doubt respond. The implications of the political and security dynamics of the Middle East for the United States and other nations are truly profound and sobering. **Beyond Sand and Oil** provides a nation-by-nation overview of the evolution of nuclear weapons programs in what is likely the world's most politically unstable region. A detailed assessment of Iran's prospects for becoming a nuclear weapons state and how Israel, the Arab world, and the international community will respond to that outcome is also included. **Beyond Russia's Past: A Comprehensive Journey Through History** Pasquale De Marco, 2025-05-16 Journey through the annals of Russian history in this comprehensive and engaging exploration of a nation's triumphs, trials, and enduring legacy. Russia's Islam and Orthodoxy beyond the Institutions Alfrid K. Bustanov, Michael Kemper, 2019-10-23

Islam and the Orthodox Church in contemporary Russia are usually studied in isolation from each other and each in relation to the Kremlin. The latter demands the development of a home-grown and patriotic religious traditionalism as a bulwark against subversive non-traditional imports. This volume breaks new ground by focusing on charismatic missionaries from both religions who bypass the hierarchies of their respective faith organizations and challenge the traditionalism paradigm from within Russia's many religious traditions and who give new meanings to the well-known catchwords of Russia's identity discourse. The Moscow priest Daniil Sysoev confronted the Russian Orthodox Church with Uranopolitism, a spiritual vision that defies patriotism and nationalism. The media-savvy Geidar Dzhemal projected an Islamic Eurasianism and a world revolution for which Russia's Muslims would provide the vanguard and the Islamic terrorist Said Buriatskii found respect among left and right-wing Russians through his Islamic adaptation of Lev Gumilev's passionarity paradigm. On the other side, Russian experts and journalists who propagate the official paradigm of Russia's traditional Islam argue from either Orthodox or secularist perspectives and fail to give content to the concept. This allows even moderate Salafis to argue that their creed is Russia's real traditionalist Islam. This book was originally published as a special issue of *Islam and Christian Muslim Relations*.

Science Beyond Borders: International Collaborations In Basic Sciences Dinesh Kumar Srivastava, V S Ramamurthy, Shailesh Nayak, Suba Chandran, 2025-01-24

International collaboration in basic sciences allows researchers from different countries to pool their expertise, knowledge, and resources. This combined effort tackles complex scientific challenges that might be beyond the intellectual, technical, and financial capabilities of a single nation. It fosters the sharing of data and ideas, accelerates scientific progress, and leads to breakthroughs that benefit all of humanity. This was established in tackling COVID-19, establishment of CERN, building of LHC, ITER, FAIR, LIGO, SKA, TMT, scores of terrestrial and space telescopes, International Space Station, Space Missions, discovery of Higgs boson, discovery of gravitational waves, green revolution, understanding of weather and monsoon in a rapidly warming world, and spread of modern technology and education across the world, etc. The most challenging problem facing the world now is climate change, which can only be solved if every nation cooperates and contributes to mitigation measures and research outlined by scientists from across the world. This presents us with a huge existential challenge which can only be met when each one of us contributes to the spirit of the entire world being one family and with the conviction of the futility of conflict. If we fail to rise to the occasion, our very

survival on this planet would become extremely difficult and near impossible This book will be of interest to science policymakers in industry or government as well as laypersons interested in the history of science cosmology particle physics or scientific collaborations *Beyond Totalitarianism* Michael Geyer, Sheila Fitzpatrick, 2009 These essays rethink the nature of Stalinism and Nazism and establish a new methodology for viewing their histories that goes well beyond outdated twentieth century models of totalitarianism ideology and personality They offer a new understanding of the intertwined trajectories of socialism and nationalism in European and global history *Transition and Beyond* S. Estrin, G. Kolodko, M. Uvalic, 2007-08-10 This book covers a wide variety of aspects of transition in Central and Southeast Europe and the CIS including the socialist legacy privatization and growth skills and banking reforms It also covers the evolution of the global economy beyond transition looking at complexity risk management the optimal transition path and globalization
