Forced Migration across Mexico Ximena Alba Villalever, Stephanie Schütze, Ludger Pries, Oscar Calderón Morillón, 2024-03-11 This book analyzes the different ways in which forced migration comes together with organized violence in the Americas focusing specifically on the migration corridor from Central America through Mexico and on to the United States No matter their starting point most South and Central American migrants to the United States must eventually traverse Mexico and often many other borders beforehand to reach their destination As border controls tighten for many migrants turning back is not a possibility or something they desire And so when faced with hardening policies migrants are often forced into situations of increased violence and precarity without a shift in their ultimate objective This book analyzes the complex social situations of everyday violence and increasingly aggressive border controls which face migrants in Mexico as well as their exposure to a different kind of violence during their migration trajectory through the criminal actors such as gangs cartels and corrupt law enforcements that seek to make a profit from them The book takes a critical approach on migration policies and on the externalization of borders by analyzing their effects on the trajectories and experiences of migrants themselves It shows that the more migrants opportunities and rights during transit are hindered the more they are at risk of exposure to these actors Foregrounding the voices of migrants this book offers fresh insights into debates surrounding migration politics international relations and anthropology in the Americas
