Wildfires, 2004 The 2000 and 2002 fire seasons were by most standards among the worst in the past Many argue that the threat of severe wildfires has grown because of unnaturally high fuel loads e g dense undergrowth undergrown and dead trees raising concerns about damage to property and homes in the wildland urban interface WUI homes in or near forests Debates about fire control and protection including funding and fuel treatment e g thinning and prescribed burning have focused on national forests and other federal lands but nonfederal lands are also at risk This new book explores the latest issues dealing with wildfires the consequences that they sow and what means are being used to prevent and protect the environment and the local populations

Saving a Place: Endangered Species in the 21st Century John A. Baden, Pete Geddes, 2018-02-05 This title was first published in 2000 The noble goals embodied in the Endangered Species Act are colliding with financial and social realities Citizens increasingly face the costs of current policies while initiatives which fail to respect liberty and property meet serious resistance at every turn Despite widespread verbal support for saving species at any cost when trade offs become obvious and values compete support for these policies evaporates This edited collection examines ethically and materially responsible approaches to this

problem written by leading international figures from a variety of disciplines The result is the most comprehensive and constructive analysis of the effectiveness and viability of endangered species protection available Yosemite National Park (N.P.), Yosemite Fire Management Plan ,2004 **Draft Yosemite Fire Management Plan** United States. National Park Service,2002 California Grasslands Mark R. Stromberg,Jeffrey D. Corbin,Carla D'Antonio,2007-12-03 This highly synthetic and scholarly work brings together new and important scientific contributions by leading experts on a rich diversity of topics concerning the history ecology and conservation of California s endangered grasslands The editors and authors have succeeded admirably in drawing from a great wealth of recent research to produce a widely accessible and compelling state of the art treatment of this fascinating subject Anyone interested in Californian biodiversity or grassland ecosystems in general will find this book to be an invaluable resource and a major inspiration for further research management and restoration efforts Bruce G Baldwin W L Jepson Professor and Curator UC Berkeley Grasses and grasslands are among the most important elements of the California landscape This is their book embodying the kind of integrated view needed for all ecological communities in California Approaches ranging across an incredibly broad spectrum paleontology and human history basic science and practical management techniques systematics community ecology physiology and genetics physical factors such as water soil nutrients atmospheric and fire biological factors such as competition symbiosis and grazing are nicely tied together due to careful editorial work This is an indispensable reference for everyone interested in the California environment Brent Mishler Director of the University Jepson Herbaria and Professor of Integrative Biology UC Berkeley The structure and function of California grasslands have intrigued ecologists for decades The editors of this volume have assembled a comprehensive set of reviews by a group of outstanding authors on the natural history structure management and restoration of this economically and ecologically important ecosystem Scott L Collins Professor of Biology University of New Mexico **Review and Update of the 1995 Federal Wildland Fire Management Policy** United States.
