Fleck, 2022 Metastatic cancer and costly precision medicines generate extremely complex problems of health care justice that previous theories of justice cannot address adequately Fleck argues that what we need is a political conception of health care justice following Rawls and a fair and inclusive process of rational democratic deliberation governed by public reason While ideally just outcomes are a moral and political impossibility wicked ethical problems can metastasize if rationing decisions are made in ways effectively hidden from those affected by those decisions As Fleck demonstrates a fair and inclusive process of democratic deliberation makes these wicked problems visible to public reason Equality and Education Michael A. Rebell, Arthur R. Block, 2014-07-14 Using an innovative blending of ideological implementation and comparative institutional analysis this book takes the New York City case as a springboard for assessing the role of an executive agency in making and implementing egalitarian policies Originally published in 1985 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Social Justice and Transformative Learning Saundra M. question of what it is to value something as opposed say to wanting it wanting to want it or thinking that it is valuable Other essays explore particular values such as equality whose meaning and content are contested Still others consider the tensions that arise both within and among individuals in consequence of the diversity of human values One of the overarching aims of the book is to illuminate the different ways in which liberal political theory attempts to resolve conflicts of both of these kinds

Ethnopsychology Rolando Díaz-Loving, 2019-10-08 This book presents an overview of Mexican ethnopsychology an original theoretical and methodological approach that seeks to complement the mainstream psychological science based on universal principles processes and constructs with scientific methods to study the idiosyncratic features and behaviors typical of specific cultural groups It proposes a historic bio psycho socio cultural theoretical model to describe research findings of social psychological collective and individual phenomena Psychology is at a crossroads of years of research with stress on internal validity and little attention to contextual and cultural variables It becomes fundamental to continue on the internal validity track but at the same time incorporate external validity issues The growth of indigenous movements and data allows for a profound evaluation of the extents to which apparent universal phenomena are truly universal and to what extent they are idiosyncratic manifestations of the cultures where the mainstream research is conducted Mexican ethnopsychologists have been following this path for decades since the pioneer work of Rogelio D az Guerrero but until now little has been published in English about this innovative theoretical approach Ethnopsychology Pieces from the Mexican Research Gallery fills this gap by presenting the international community an overview of Mexican ethnopsychology and thus providing a useful tool to behavioral social and health scientists interested in understanding how culture shapes both collective and individual behaviors

Long Lives Are for the Rich Jan Baars, 2023-07-26 Long Lives Are for the Rich is the title of a silent ominous program that affects the lives of millions of people In all developed countries disadvantaged and especially poor people die much earlier than the most advantaged During these shorter lives they suffer ten to twenty years longer from disabilities or chronic disease This does not happen accidentally health inequalities including those between healthy and unhealthy life styles are mainly caused by social inequalities that are reproduced over the life course This crucial function of the life course has become painfully visible during its neoliberal reorganization since the early 1980s Studies about aging over the life course from birth to death show the inhumane consequences as people get older In spite of the enormous wealth that has been piled up in the US for a dwindling percentage of the population there has been growing public indifference about the needs of those in jobs with low pay and high stress but also about citizens from a broad middle class who can hardly afford high quality education or healthcare However this ominous program affects all recent mortality rates show that all Americans including the rich are unhealthier and dying earlier than citizens of other developed countries Moreover the underlying social inequalities are tearing the population apart with nasty consequences for all citizens including the rich Although the public awareness of the consequences has been growing neoliberal policies remain tempting

for the economic and political elites of the developed world because of the enormous wealth that is flowing to the top All this poses urgent questions of social justice Unfortunately the predominant studies of social justice along the life course help to reproduce these inequalities by neglecting them This book analyzes the main dynamics of social inequality over the life course and proposes a theory of social justice that sketches a way forward for a country that is willing to invest in its greatest resource the creative potential of its population

Crisis-Related Decision-Making and the Influence of Culture on the Behavior of Decision Makers Ásthildur Elva Bernhardsdóttir, 2015-08-31 This book provides an analysis on the impact of culture on crisis management exploring how different cultural types are reflected in crisis related decision making patterns Providing an interdisciplinary and international perspective with a rich research and practical outlook this work is an important contribution to the field of crisis management and decision making Offering essential understanding to how countries organizations groups and individuals prepare for and respond to crises thus combining research across several disciplines offering theoretical development empirical testing and reporting on the testing of a large number of hypotheses across several frameworks The novelty of this book lies in its presentation of the quantitative testing of the relationship between cultural theory and crisis management drawing on data from cases that cross continents and crises types The book also includes a review of cases from South Korea and suggests a number of ways in which practitioners at various levels of government can prepare their organizations to cope better with the introduction of cultural bias into the decision making process Those with an interest in risk management disaster management and crisis management will value this pioneering work as it reveals the influence of cultural bias in decision making processes This work offers important insights for practice as well as for theory building scholars and practitioners of public administration management political and international relations organizational social and cultural psychology amongst others will all gain from reading this work

Modern Theories of Justice Serge-Christophe Kolm, 2002 This first book in English by Serge Christophe Kolm provides an overview of his far reaching vision of distributive justice Kolm derives justice from considerations of rationality Justice cannot be defined by one all encompassing principle or set of a few principles It has the general form of an equality of individuals liberties in a broad sense with different applications and specific adjustments when several liberties conflict or when everybody prefers another outcome Kolm describes the theory of justice and presents and evaluates each of the various modern theories principles or criteria of justice He shows how some complement each other how some are unworkable and how some could be rescued The result is an intensive introduction to the general theory of justice for economists and noneconomists alike

Theories of Justice Alejandra Mancilla, 2017-05-15 Forty years ago in his landmark work A Theory of Justice the American philosopher John Rawls depicted a just society as a fair system of cooperation between citizens regarded as free and equal persons Justice Rawls famously claimed is the first virtue of social institutions Ever since then moral and political philosophers have expanded expounded and criticized Rawls s main tenets from perspectives as diverse as egalitarianism left

and right libertarianism and the ethics of care This volume of essays provides a general overview of the main strands in contemporary justice theorising and features the most important and influential theories of justice from the post Rawlsian era These theories range from how to build a theory of justice and how to delineate its proper scope to the relationship between justice and equality justice and liberty and justice and desert Also included is the critique of the Rawlsian paradigm especially from feminist perspectives and from the growing strand of non ideal theory as well as consideration of more recent developments and methodological issues *Torts, Egalitarianism and Distributive Justice* Tsachi Keren-Paz,2018-12-20 This book argues from a normative perspective for the incorporation of an egalitarian sensitivity into tort law and more generally into private law It shows how an egalitarian sensitivity can reformulate tort doctrine with an emphasis on the tort of negligence Rather than a comprehensive descriptive account of existing tort law this book pro actively searches for new approaches and conceptual tools to meet the challenges faced by egalitarians The understanding of tort law offered in this book will bring about better practical results in specific cases It supports the progressive troops in the ongoing philosophical and social battles that take place in the field of tort law and also adds another voice rich nuanced and sensitive to the chorus that is tort theory Inheritance of Wealth Daniel Halliday,2018-01-26 Daniel Halliday examines the moral grounding of the right to bequeath or transfer wealth He engages with contemporary concerns about wealth inequality class hierarchy and taxation while also drawing on the history of the egalitarian utilitarian and liberal traditions in political philosophy He presents an egalitarian case for restricting inherited wealth arguing that unrestricted inheritance is unjust to the extent that it enables and enhances the intergenerational replication of inequality Here inequality is understood in a group based sense the unjust effects of inheritance are principally in its tendency to concentrate certain opportunities into certain groups This results in what Halliday describes as economic segregation He defends a specific proposal about how to tax inherited wealth roughly inheritance should be taxed more heavily when it comes from old money He rebuts some sceptical arguments against inheritance taxes and makes suggestions about how tax schemes should be designed Advances on Practical Applications of Agents and Multiagent Systems Yves Demazeau,Michal Pechoucek,Juan Manuel Corchado Rodríguez,Javier Bajo Pérez,2011-03-11 PAAMS the International Conference on Practical Applications of Agents and Multi Agent Systems is the international yearly tribune to present to discuss and to disseminate the latest developments and the most important outcomes related to real world applications It provides a unique opportunity to bring multi disciplinary experts academics and practitioners together to exchange their experience in the development of Agents and Multi Agent Systems This volume presents the papers that have been accepted for the 2011 edition These articles capture the most innovative results and this year s trends Finance and Trading Information Systems and Organisations Leisure Culture and Interactions Medicine and Cloud Computing Platforms and Adaptation Robotics and Manufacturing Security and Privacy Transports and Optimisation paper Justice and Equality in Education Lorella Terzi,2010-05-09
