Cognition as Intuitive Statistics Gerd Gigerenzer, David J. Murray, 2015-08-14 Originally published in 1987 this title is about theory construction in psychology Where theories come from as opposed to how they become established was almost a no man s land in the history and philosophy of science at the time The authors argue that in the science of mind theories are particularly likely to come from tools and they are especially concerned with the emergence of the metaphor of the mind as an intuitive statistician In the first chapter the authors discuss the rise of the inference revolution which institutionalized those statistical tools that later became theories of cognitive processes In each of the four following chapters they treat one major topic of cognitive psychology and show to what degree statistical concepts transformed their understanding of those topics

**Biometrika** ,1927 **A Life of Sir Francis Galton** Nicholas Wright Gillham, 2001-11-01 Few scientists have made lasting contributions to as many fields as Francis Galton He was an important African explorer travel writer and geographer He was the meteorologist who discovered the anticyclone a pioneer in using fingerprints to identify individuals the inventor of regression and correlation analysis in statistics and the founder of the eugenics movement Now Nicholas Gillham paints an engaging portrait of this Victorian polymath The book traces Galton s ancestry he was the grandson of Erasmus Darwin and the cousin of Charles Darwin upbringing training as a medical apprentice and experience as a Cambridge undergraduate It recounts in colorful detail Galton s adventures as leader of his own expedition in Namibia Darwin was always a strong influence on his cousin and a turning point in Galton s life was the publication of the Origin of Species Thereafter Galton devoted most of his life to human heredity using then novel methods such as pedigree analysis and twin studies to argue that talent and character were inherited and that humans could be selectively bred to enhance these qualities To this end he founded the eugenics movement which rapidly gained momentum early in the last century After Galton s death however eugenics took a more sinister path as in the United States where by 1913 sixteen states had involuntary sterilization laws and in Germany where the goal of racial purity was pushed to its horrific limit in the final solution Galton himself Gillham writes would have been appalled by the extremes to which eugenics was carried Here then is a vibrant biography of a remarkable scientist as well as a superb portrait of science in the Victorian era

Patents Issued from the United States Patent and Trademark Office, 1991 An Ideological Death Rachel S.

Harris, 2014-08-15 An Ideological Death Suicide in Israeli Literature examines literary challenges to Israel's national narratives. The centrality of the army, the mythology of the new Jew, the vision of the first Israeli city, Tel Aviv, and the very process by which a nation's history is constructed are confronted in fiction by many prominent Israeli writers. Using the image of suicide, A. B. Yehoshua, Amos Oz, Etgar Keret, Yehudit Katzir, Alon Hilu, Yaakov Shabtai, Benjamin Tammuz, and Yehoshua Kenaz each engage in a critical and rhetorical process that examines the nation's formation and reconsiders myths at the heart of the Zionist project. In Israeli literature, suicide represents a society's compulsion to create impossible ideals that leave its populace disappointed and deluded. Yet as Rachel S. Harris shows, even at their harshest, these writers also represent the idealism that helped build Israel as a modern nation state. **The Seven Pillars of Statistical Wisdom**

Stephen M. Stigler, 2016-03-07 What gives statistics its unity as a science? Stephen Stigler sets forth the seven foundational ideas of statistics, a scientific discipline related to but distinct from mathematics and computer science, and one which often seems counterintuitive. His original account will fascinate the interested layperson and engage the professional statistician.
