Schatz,2008 Having the opportunity to teach math for over 25 years I have found many days when you hit a brick wall Whether it was in middle school junior or senior high school or at the community college there were days when the new topic was not understood by the students I could see it in their reaction faces to my explanation Sometimes I was the culprit Knowing full well that the homework is a review of that day s topic it must be delayed As an educator teaching math the crescendo of each day builds as we go further into the school calendar Someone who missed out and could not grasp the idea needed to be tutored That luxury is not available FRUSTRATIONS TEACHING MATH gives the student an opportunity to see how basic math ideas are solved Sometimes I give two scenarios in solving a problem Other times a cheating way is shown so that math can be understood and also be fun Some of the topics covered are the various ways to factor a binomial trinomial or polynomial Another favorite is grasping the concept of greatest common factor or least common multiple Right triangle trigonometry for the middle school student is explained using boating as the source of frustration How much to tip at a restaurant What does a half off sale really mean Let us not forget the story or word problems that really cause concerns Distance Rate Time All these ideas plus games and many more mathematical topics are reviewed on my 45 day road trip from Delaware to Florida Coming back with several stops on the way home we ll explore these frustrations [Nostalgic Virility as a Cause of War](#) Matthieu Grandpierron,2024-03-12 Why do great powers go to war Why are non violent diplomatic options not prioritized Nostalgic Virility as a Cause of War argues that world leaders react to status decline by going to war guided by a nostalgic virile understanding of what it means to be powerful This nostalgic virility a system of subjective beliefs about power bravery strength morality and health acts as a filter through which leaders articulate glorified interpretations of history and assess their power and their country s status on the international stage In this rigorous study of France the United Kingdom and the United States Matthieu Grandpierron tests the theory of nostalgic virility against the two more common theoretical frameworks of realism and the diversionary theory of war Consulting thousands of newly declassified government documents at the highest levels of decision making Grandpierron examines three specific cases the early years of the Indochina War 1945-47 the British reconquest of the Falklands in 1982 and the US invasion of Grenada in 1983 convincingly contending that status seeking behaviour and nostalgic virility are more relevant in explaining why a leader chooses war and conflict over non violent diplomatic options than the dominant frameworks Looking to the recent past Nostalgic Virility as a Cause of War considers how this new model can be applied to current conflicts from the Russian war in Ukraine to Chinese actions in the South China Sea and provides surprising ways of thinking about the relationship between power decision makers and causes of war [Encyclopedia of Demons in World Religions and Cultures](#) Theresa Bane,2014-01-10 This exhaustive volume catalogs nearly three thousand demons in the mythologies and lore of virtually every ancient society and most religions From Aamon the demon of life and reproduction with the head of a serpent and the body of a wolf in Christian demonology to Zu the half man half bird personification of the southern wind and thunder clouds

UNTOLD HISTORY Bernadine E. Ahonkhai, ED. D, 2025-01-06. UNTOLD HISTORY illustrates how African history is intertwined with and foundational to American history. The book begins this narrative in the fourteenth century when European seafarers discovered the coastal regions of Africa, describes the meeting of the three worlds—Europe, Africa, and the New World, later known as America, and details the increasing interactions of the three worlds after the 1450s. The author dispels some of the misconceptions about pre-colonial Africa by presenting the history and culture of the African continent from a distinctively African lens. As such, this book chronicles some prominent African empires and kingdoms, Africa-European bilateral trade relations, the trans-Atlantic Slave trade, and contemporary Africans in the United States. The book highlights stories of contemporary Africans residing in the United States and documents the contributions of early and contemporary Africans to the history, economic development, culture, and prominence of the United States of America. It concludes with a snapshot of contemporary Africa. The book provides a framework for understanding the history of Africa prior to the arrival of European merchants on its shores. African civilizations, cultures, legacy, and contributions to American history. Educators can use the book to supplement their course on American History, World History, African American History in pre-collegiate or collegiate settings. This book can help educators to reimagine the teaching and learning of the United States history by centering on important narratives in Africa and with Africans in the American diaspora. The book is organized chronologically and can help the reader to understand the past as it relates to the present world. To facilitate teaching, each chapter opens with a quotation that introduces the content of the chapter and ends with study discussion questions that educators can use or adapt as appropriate for instruction and to ensure full comprehensive understanding of the content presented.
