

An invaluable resource from The Royal Society of Chemistry

Eight Peak Index of Mass Spectra, 3rd Edition

The Eight Peak Index of Mass Spectra is the world's largest printed index of mass spectral data! An excellent aid for identifying unknown compounds, it's also a convenient single point of entry to the various full mass spectral collections and mass spectral information appearing in scientific journals.

This new index contains the eight most abundant ions in 66,720 mass spectra, covering 52,332 compounds indexed by molecular weight, elemental composition and most abundant ions. Contains twice as many spectra as the previous addition.

The Eight Peak Index of Mass Spectra can be used for the identification of unknown compounds by

simply comparing mass spectral data of the unknown with the equivalent data of known compounds contained in the Eight Peak Index.

CAS Registry Numbers

A special feature of the Eight Peak Index is the CAS Registry Number assigned to each unique compound. This number can be used to access information concerning that compound in a multitude of manual and computer readable files. It's a useful link to other information sources.

Source of Data

The Eight Peak Index is published by the Mass Spectrometry Data Cen-

tre. Sources of the spectra are as follows: Imperial Chemical Industries, general mass spectrometry literature, American Petroleum Institute/Thermodynamics Research Centre, the American Society for Testing and Materials, the Dow Chemical Company, the Mass Spectrometry Data Centre, John Wiley and Sons Inc., and the NIEH/PA System.

Indexing System

Seven bound books are indexed in the following ways:

Volume 1, Parts 1 and 2—Molecular weight sub-indexed on formula.

Spectra appear in ascending mol. wt. order, sub-indexed on number of carbon, hydrogen, oxygen atoms, etc. For use with KNOWN mol. wt. or formula, UNKNOWN spectra.

Volume 2, Parts 1 and 2—Molecular weight sub-indexed on fragment ion m/z values. Spectra appear in ascending mol. wt. order. For each mol. wt. spectra are grouped in increasing m/z of the most abundant ion, UNKNOWN formula.

Volume 3, Parts 1, 2, and 3—Fragment ion m/z values of the two most abundant ions. Spectra appear in ascending order of m/z of the most abundant ion followed by that same m/z of the 2nd most abundant ion, while maintaining an ascending m/z for the most abundant ion. For use with KNOWN spectral values, UNKNOWN mol. wt. or formula.
