Declarations of Dependency Alan F. Zundel, 2000-10-12 Presents an original and provocative argument about poverty policy in the United States **Transfer State** Peter Sloman, 2019-10-30 The idea of a guaranteed minimum income has been central to British social policy debates for more than a century Since the First World War a variety of market economists radical activists and social reformers have emphasized the possibility of tackling poverty through direct cash transfers between the state and its citizens As manufacturing employment has declined and wage inequality has grown since the 1970s cash benefits and tax credits have become an important source of income for millions of working age households including many low paid workers with children The nature and purpose of these transfer payments however remain highly contested Conservative and New Labour governments have used in work benefits and conditionality requirements to activate the unemployed and reinforce the incentives to take low paid work an approach which has reached its apogee in Universal Credit

By contrast a growing number of campaigners have argued that the challenge of providing economic security in an age of automation would be better met by paying a Universal Basic Income to all citizens Transfer State provides the first detailed history of guaranteed income proposals in modern Britain which brings together intellectual history and archival research to show how the pursuit of an integrated tax and benefit system has shaped UK public policy since 1918 The result is a major new analysis of the role of cash transfers in the British welfare state which sets Universal Credit in a historical perspective and examines the cultural and political barriers to a Universal Basic Income *Mothering by Degrees* Jillian M.

Duquaine-Watson,2017-05-31 In *Mothering by Degrees* Jillian Duquaine Watson shows how single mothers pursuing college degrees must navigate a difficult course as they attempt to reconcile their identities as single moms college students and in many cases employees They also negotiate a balance between what they think a good mother should be and what society is telling them and how that affects their choices to go to college and whether to stay in college or not The first book length study to focus on the lives and experiences of single mothers who are college students *Mothering by Degrees* points out how these women are influenced by dominant American ideologies of motherhood and the institutional parameters of the schools they attend and argues for increased attention to the specific ways in which the choices challenges and opportunities available to mothers are shaped within their specific environments as well as the ways in which mothers help shape those environments *Connecting Past and Present* Ira Harkavy,Bill M. Donovan,2023-07-03 The question that animates volume

16th in the Service Learning in the Disciplines Series is Why connect service learning to history courses The contributors answer that question in different ways and illustrate and highlight a diversity of historical approaches and interpretations All agree however that they do their jobs better as teachers and in some cases as researchers by engaging their students in service learning An interesting read with a compelling case for the importance of history and how service learning can improve the historian s craft **The New Palgrave Dictionary of Economics** ,2016-05-18 The award winning The New

Family Values Melinda Cooper,2017-02-01 Why was the discourse of family values so pivotal to the conservative and free market revolution of the 1980s and why has it continued to exert such a profound influence on American political life Why have free market neoliberals so often made common cause with social conservatives on the question of family despite

their differences on all other issues In this book Melinda Cooper challenges the idea that neoliberalism privileges atomized individualism over familial solidarities and contractual freedom over inherited status Delving into the history of the American poor laws she shows how the liberal ethos of personal responsibility was always undergirded by a wider imperative of family responsibility and how this investment in kinship obligations recurrently facilitated the working relationship between free market liberals and social conservatives Neoliberalism she argues must be understood as an effort to revive and extend the poor law tradition in the contemporary idiom of household debt As neoliberal policymakers imposed cuts to health education and welfare budgets they simultaneously identified the family as a wholesale alternative to the twentieth century welfare state And as the responsibility for deficit spending shifted from the state to the household the private debt obligations of family were defined as foundational to socio economic order Despite their differences neoliberals and social conservatives were in agreement that the bonds of family needed to be encouraged and at the limit enforced as a necessary counterpart to market freedom In a series of case studies ranging from Clinton s welfare reform to the AIDS epidemic and from same sex marriage to the student loan crisis Cooper explores the key policy contributions made by neoliberal economists and legal theorists Only by restoring the question of family to its central place in the neoliberal project she argues can we make sense of the defining political alliance of our times that between free market economics and social conservatism *Wretched Refuse?* Alex Nowrasteh, Benjamin Powell, 2020-12-17 An empirical investigation into the impact of immigration on institutions and prosperity
